De neuronas a galaxias. ¿Es el universo un holograma? Adolfo Plasencia Diago, 2021-04-30 La ciencia hoy en día es más un proceso de colaboración que momentos eureka individuales. Mediante una serie de diálogos interconectados con destacados científicos a los que se les pide que reflexionen sobre preguntas y conceptos clave en torno al mundo físico, la tecnología y la mente, se recrea aquí este tipo de sinergia. Estos pensadores aportan tanto observaciones específicas como comentarios más amplios sobre las tradiciones intelectuales que se han ocupado de estas preguntas y al hacerlo revelan una rica veta de ideas que interactúan entre sí.
