Matematicheskaya Fizika Entsiklopediya:

Great Soviet Encyclopedia Aleksandr Mikhaïlovich Prokhorov, 1973 **Historical Studies in the Physical Sciences, Volume 5** Russell McCormmach, 2015-03-08 Historical Studies in the Physical Sciences is a continuing series of volumes comprising articles that elucidate the intellectual and social history of the physical sciences from the eighteenth century to the present. The articles offered in Volume 5 share a common theme: a concern with modern physics and its relation to other scientific disciplines and to its cultural and material context. Originally published in 1975, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Historical Studies in the Physical Sciences Russell McCormmach, 1969 *The World of Andrei Sakharov* Геннадий Ефимович Горелик, Antonina W. Bouis, 2005-04-14 Recently declassified documents show that Sakharov's metamorphosis was caused by professional concerns particularly regarding the development of an antiballistic missile defense. Bibliography of Russian Mathematics Books George Elmer Forsythe, 1956 **Mathematical Reviews**, 1987
Monthly Index of Russian Accessions Library of Congress. Processing Department, 1966-08 *Irregular Serials and Annuals* R. R. Bowker LLC, 1980-12 **Monthly Index of Russian Accessions**, 1964 Monthly List of Russian Accessions Library of Congress. Processing Department, 1966-07 *S.L. Frank* Philip Boobbyer, 1995 There are many reasons for writing a biography of Semyon Frank. Quite apart from his philosophy, he lived a remarkable life. Born in Moscow in 1877, he was exiled from Soviet Russia in 1922 and died in London in 1950. The son of a Jewish doctor, he became a revolutionary Social Democrat in his teens and finished his life as a Neoplatonist Christian. One of the Russian revisionist Marxists, he was then involved in the Kadet Party during the 1905 revolution before breaking with active political activity and turning to philosophy. He lived in Petrograd through the First World War until September 1917, after which he went to Saratov where he experienced the chaos of the Russian Civil War. Living in Germany after his exile, he witnessed the rise of Hitler in Berlin, left for France in a hurry in 1937, and spent part of the war hiding from the Gestapo in the Grenoble mountains. It was a life that encompassed a lot of history. Yet along with this, Frank was arguably Russia's greatest twentieth-century philosopher. Indeed, V. V. Zenkovskii, the historian of Russian philosophy, considered Frank in strength of philosophic vision the most outstanding among Russian philosophers, generally not merely among those who share his ideas. For its lucidity, conciseness, systematic character, and unity, Zenkovskii considered Frank's system the highest achievement of Russian philosophy. Doubtless, Zenkovskii's assessment is disputable, but his remarks emphasize Frank's stature in the Russian tradition. In the style of German idealism, Frank constructed a comprehensive philosophical system which he believed

offered a coherent alternative to materialism. He was deeply worried by the implications of epistemological relativism and constructed a system of metaphysics designed to link epistemology and ontology to bridge the gulf between thought and being. In addition, he attempted to express the idea of a personal God in philosophical language. His system also embraced social philosophy, anthropology, and ethics from the Introduction by the author.
