## **Material Culture And Cultural Materialisms:**

**Material Culture and Cultural Materialisms in the Middle Ages and Renaissance** Curtis Perry, 2001 The essays in this collection challenge cultural materialists in different disciplines to articulate specific relationships between modern theoretical positions and the ideas and conventions that shaped the production of medieval and Renaissance cultures in Europe

**Material Culture and Mass Consumerism** Daniel Miller, 1997-12-08 Exploring materialism and social relationships in modern culture Material Culture and Mass Consumption offers an in depth exploration of objects objectification ideology and materialism in modern society Drawing from Hegel Marx Munn and Simmel the discussion delves into the physicality of the material world and attempts to understand materialism as a form of cultural expression Targeting mass production as the root of mass consumption rather than the result this book positions material goods at odds with genuine social interaction and questions these relationships from the abstract to the intensely specific Material Culture

Victor Buchli, 2004 Publisher description

**Material Culture and Technology in Everyday Life** Phillip Vannini, 2009 Focusing on the technoculture of everyday life this book attempts to zero in on the simplicity and the habitual character of the interaction between humans and material objects which is often assumed or taken for granted Because objects are always meaningful in the pragmatic use to which they are directed the material world of everyday life can be seen as a technoculture of its own one made of behaviors as simple and yet as significant as using a lawnmower or decorating one's body In discussing the unique methodological components of the ethnography of the technoculture of everyday life this book begins a dialogue on how we can examine from the participants perspective the interconnections between social agents their technological material practices their material objects or technics and their social and material environment

*Cultural Materialism* Andrew Milner, 1993 This book places cultural materialism in relation to earlier paradigms such as literary humanism and Marxism and explains how the new paradigm has been applied to important areas such as cultural studies media studies and literary studies

Material Powers Tony Bennett, Patrick Joyce, 2013-05-13 This edited collection is a major contribution to the current development of a material turn in the social sciences and humanities It does so by exploring new understandings of how power is made up and exercised by examining the role of material infrastructures in the organization of state power and the role of material cultural practices in the organization of colonial forms of governance A diverse range of historical examples is drawn on in illustrating these concerns from the role of territorial engineering projects in seventeenth century France through the development of the postal system in nineteenth century Britain to the relations between the state and road building in contemporary Peru for example The colonial contexts examined are similarly varied ranging from the role of photographic practices in the constitution of colonial power in India and the measurement of the bodies of the colonized in French colonial practices to the part played by the relations between museums and expeditions in the organization of Australian forms of colonial rule These specific concerns are connected to major critical re examination

of the limits of the earlier formulations of cultural materialism and the logic of the cultural turn The collection brings together a group of key international scholars whose work has played a leading role in debates in and across the fields of history visual culture studies anthropology geography cultural studies museum studies and literary studies

**Human Materialism** Paul J. Magnarella, 1993 Substantive interesting and provocative Magnarella has advanced anthropological theory through this work I believe this book will become a classic in the field Mario D Zamora College of William and Mary Refreshing and very welcome builds on and expands many of the time honored concepts in ethnographic science a sound piece of scholarship that focuses our attention on important questions and unresolved debates in the field a model that many anthropologists will most likely want to test against their own field experience and data Andrei Simic University of Southern California Human materialism Magnarella s new paradigm for anthropology offers both an abstract model of sociocultural systems and a research strategy Designed to be dynamic rather than mechanical the paradigm is flexible enough to deal with systems as small as families or hunting and gathering bands and as large as modern nations and international systems Furthermore it can address issues in any social science area from questions of kinship and law to questions of religion education and politics The author supplies several case studies to illustrate how human materialism applies to this range of sociocultural situations state level politics and civil violence in Turkey religion and politics within Arabia s Ikhwan movement religion myth and symbolic systems among Siberia s Koryak Human materialism not only places human behavior within its environmental context but focuses significantly on human thought especially the plans strategies and agendas of societal leaders The paradigm integrates a spectrum of theoretical perspectives that are often viewed by anthropologists as mutually exclusive and competitive In the process it reaffirms the field s traditional holistic approach to the study of culture and society Magnarella contends that such an integrative paradigm can resolve the debate among cultural anthropologists those seeking scientific explanations as well as those searching for meaning This work will attract the attention of those interested in theory modernization economic development social and cultural change and applied and general anthropology Paul J Magnarella is professor of anthropology and affiliate professor in the Center for African Studies at the University of Florida Among his recent books are *The Peasant Venture* and *Tradition and Change in a Turkish Town*

**Science, Materialism, and the Study of Culture** Martin F. Murphy, Maxine L. Margolis, 1995 Well argued clearly written essays by anthropologists committed to understanding culture through theoretically grounded analysis of its material underpinnings The authors impassioned call for an anthropology that addresses pressing social problems exploitation inequality violence hunger and underdevelopment is a welcome counterweight to studies that view power primarily as discourse or poetics Marc Edelman Hunter College and the Graduate Center CUNY A major contribution to anthropology in both theory and application Barbara Miller George Washington University The social sciences especially cultural anthropology are mired in contentious arguments about the desirability even the applicability of scientific and causal principles in the study of culture and society

The authors of these essays come down clearly on the side of the significance of these principles claiming that a cultural materialist approach is the most productive way of explaining cultural differences and similarities and of understanding many unexplainable aspects of culture. The authors analyze both theoretical and practical issues and they critique currents in social science that claim that human behaviors and organizations are undecipherable. They also demonstrate an important but often overlooked contribution of cultural materialism: its firm commitment to understanding the injustices and inequities in societies around the world.

**Material Culture**

Kenneth L. Ames, 1985 *Shakespeare and Costume in Practice*

Bridget Escolme, 2020-12-23

What is the role of costume in Shakespeare production? *Shakespeare and Costume in Practice* argues that costume design choices are central not only to the creation of period setting and the actor's work on character but to the cultural, political, and psychological meanings that the theatre makes of Shakespeare. The book explores questions about what the first Hamlet looked like in his mourning cloak, how costumes for a Shakespeare comedy can reflect or critique the collective nostalgias a culture has for its past, how costume and casting work together to ask new questions about Shakespeare and race. Using production case studies of *Hamlet*, *Much Ado About Nothing*, and *The Tempest*, the book demonstrates that costume design can be a site of experimentation, playfulness, and transgression in the theatre and that it can provoke audiences to think again about what power, race, and gender look like on the Shakespearean stage.

Materiality and Popular Culture

Anna Malinowska, Karolina Lebek, 2016-08-12

This book critically approaches contemporary meanings of materiality and discusses ways in which we understand experience and engage with objects through popular culture in our private, social, and professional lives.

Appropriating Arjun Appadurai's famous phrase the social life of things with which he inspired scholars to take material culture more seriously and as a result treat it as an important and revealing area of cultural studies the book explores the relationship between material culture and popular practices and points to the impact they have exerted on our co-existence with material worlds in the conditions of late modernity

**Cultural Materialism** Marvin Harris, 2001-08-28 Cultural Materialism published in 1979 was Marvin Harris s first full length explication of the theory with which his work has been associated While Harris has developed and modified some of his ideas over the past two decades generations of professors have looked to this volume as the essential starting point for explaining the science of culture to students Now available again after a hiatus this edition of Cultural Materialism contains the complete text of the original book plus a new introduction by Orna and Allen Johnson that updates his ideas and examines the impact that the book and theory have had on anthropological theorizing

Culture and Materialism Raymond Williams, 2020-10-13 Raymond Williams is a towering presence in cultural studies most importantly as the founder of the approach that has come to be known as cultural materialism Yet Williams s method was always open ended and fluid and this volume collects together his most significant work from over a twenty year period in which he wrestled with the concepts of materialism and culture and their interrelationship Aside from his more directly theoretical texts however case studies of theatrical naturalism the Bloomsbury group advertising science fiction and the Welsh novel are also included as illustrations of the method at work Finally Williams s identity as an active socialist rather than simply an academic is captured by two unambiguously political pieces on the past present and future of Marxism
