## **Materials And Structures For Energy Absorption:**

Energy Absorption of Structures and Materials G Lu,T X Yu,2003-10-31 This important study focuses on the way in which structures and materials can be best designed to absorb kinetic energy in a controllable and predictable manner Understanding of energy absorption of structures and materials is important in calculating the damage to structures caused by accidental collision assessing the residual strength of structures after initial damage and in designing packaging to protect its contents in the event of impact Whilst a great deal of recent research has taken place into the energy absorption behaviour of structures and materials and significant progress has been made this knowledge is diffuse and widely scattered This book offers a synthesis of the most recent developments and forms a detailed and comprehensive view of the area It is an essential reference for all engineers concerned with materials engineering in relation to the theory of plasticity structural mechanics and impact dynamics Important new study of energy absorption of engineering structures and materials Shows how they can be designed to withstand sudden loading in a safe controllable and predictable way Illuminating case studies back up the theoretical analysis *Materials and Structures for Energy Absorption* ,2000 Contains six papers presented at the May 2000 seminar on impact and the energy absorbing capabilities of materials and structures The solutions offered by the British and German contributors consider weight trade offs and combinations of materials made into complex structures by novel manufacturing methods to achieve optimal performance The topics are automobile design for crashworthiness woven polypropylene sheets controlling structural collapse in off axis impacts of rail vehicles by retrospective modification energy absorbing subfloor structures in helicopters and airplanes a fiber metal laminate based on a glass fiber reinforced polypropylene composite compared with a traditional carbon fiber reinforced epoxy and autobody sheet materials for crash performance No index Distributed by ASME c Book News Inc
