Applications of the Mössbauer Effect, 1985 **Mössbauer Spectroscopy Applied to Magnetism and Materials Science** G.J Long, F. Grandjean, 2013-06-29 During the past 30 years materials science has developed into a full fledged field for basic and applied scientific enquiry Indeed materials scientists have devoted their efforts to creating new materials with improved electronic magnetic thermal mechanical and optical properties Often unnoticed these new materials are rapidly invading our homes and automobiles and may be found in our utensils electronic equipment textiles home appliances and electric motors Even though they may go unnoticed these new materials have either improved the efficiency and lifetime of these items or have reduced their weight or cost In particular magnetically ordered materials are useful in various applications such as motors magnetic imaging magnetic recording and magnetic levitation Hence much effort has been devoted to the development of better hard magnetic materials magnetic thin films and molecular magnets During the same period of time Mossbauer effect spectroscopy has grown from a laboratory curiosity to a mature spectroscopic technique a technique that probes solid state materials at specific atomic sites and yields microscopic information on the magnetic and electronic properties of these materials Iron 57 is the most commonly and easily used Mossbauer effect isotope and of course is particularly relevant for the study of magnetic materials Various applications of Mossbauer spectroscopy to magnetic materials are discussed in the first six chapters of this volume Other isotopes such as zinc 67 and gadolinium 155 have recently been used to study the electronic properties of zinc compounds and the electronic and magnetic properties of rare earth transition metal compounds *Nuclear and Electron Resonance Spectroscopies Applied to Materials Science* E. N. Kaufmann, G. K. Shenoy, 1981 **Applications of the Mössbauer Effect** I. S. Lyubutin, 1985 **Isotopes and Radiation Technology**, 1970 **Mössbauer Effect Reference and Data Journal**, 1990 The Rudolf Mössbauer Story Michael Kalvius, Paul Kienle, 2012-01-14 The Rudolf Mossbauer Story recounts the history of the discovery of the Mossbauer Effect in 1958 by Rudolf Mossbauer as a graduate student of Heinz Maier Leibnitz for which he received the Nobel Prize in 1961 when he was 32 years old The development of numerous applications of the Mossbauer Effect in many fields of sciences such as physics chemistry biology and medicine is reviewed by experts who contributed to this wide spread research In 1978 Mossbauer focused his research interest on a new field Neutrino Oscillations and later on the study of the properties of the neutrinos emitted by the sun *Industrial Applications of the Mössbauer Effect* Desmond C. Cook, Gilbert R. Hoy, 2012-12-06 ISIAE 2000 was organized by the Condensed Matter and Materials Physics Research Group at Old Dominion University Norfolk Virginia It brought together an international group of research scientists and engineers from academia and industry

to present details of the most recent investigations on industrially related topics and projects using Mossbauer Spectroscopy as a primary analytical technique These proceedings include the papers presented under the broad topics of Chemistry Surfaces Materials Processing Industrial Processing and Magnetic and Electronic Materials Specific research areas drawing much interest include corrosion catalysis mechanical alloying petrochemical steel and mineralogical processing nano phase materials and environmental and pollution monitoring The book is of particular interest to university researchers and a very broad range of industrial R D groups who desire to broaden their knowledge of the latest applications and methods of highly resolved spectroscopic analysis of their products

Spectroscopic Properties of Inorganic and Organometallic Compounds G. Davidson, Stephen J. Clark, 1995 Spectroscopic Properties of Inorganic and Organometallic Compounds provides a unique source of information on an important area of chemistry Divided into sections mainly according to the particular spectroscopic technique used coverage in each volume includes NMR with reference to stereochemistry dynamic systems paramagnetic complexes solid state NMR and Groups 13 18 nuclear quadrupole resonance spectroscopy vibrational spectroscopy of main group and transition element compounds and coordinated ligands and electron diffraction Reflecting the growing volume of published work in this field researchers will find this Specialist Periodical Report an invaluable source of information on current methods and applications Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading experts in their specialist fields this series is designed to help the chemistry community keep current with the latest developments in their field Each volume in the series is published either annually or biennially and is a superb reference point for researchers www.rsc.org/spr **Mössbauer Effect Data Index**, 1966 **Application of the Mössbauer Effect** I. Mössbauer Spectroscopy in Materials Science Marcel Miglierini, Dimitris Petridis, 2013-11-11 Material science is one of the most evolving fields of human activities Invention and consequent introduction of new materials for practical and or technological purposes requires as complete knowledge of the physical chemical and structural properties as possible to ensure proper and optimal usage of their new features In order to understand the macroscopic behaviour one has to search for their origin on a microscopic level A good deal of microscopic information can be obtained through hyperfine interactions Mossbauer spectroscopy offers a unique possibility for hyperfine interaction studies via probing the nearest order of resonant atoms Materials which contain the respective isotope as one of the constituent elements e g iron tin but also those which even do not contain them can be investigated In the latter case the probe atoms are incorporated into the material of interest in minor quantities ca 0.1 at % to act as probes on a nuclear level This Workshop has covered the most evolving topics in the field of Mossbauer spectroscopy applied to materials science During four working days 50 participants from 19 countries discussed the following areas Chemistry Mineralogy and Metallurgy Artificially Structured Materials Nanosized Materials and Quasicrystals and Experimental Techniques and Data Processing A total of 42 contributions 30 keynote talks reviewed the

current state of art of the method its applications for technical purposes as well as trends and perspectives A total of 39 papers are included in the present volume Applications in Chemisfr

Mossbauer Effect Data Index, Covering the 1966-1968 Literature John Gehret Stevens,1975-03 *Dynamical Properties of Solids* George K. Horton,A. A. Maradudin,Alexei A. Maradudin,1974 Volume 5 in the series Dynamical Properties of Solids contains two chapters Chapter 1 is concerned with the Mossbauer effect on the studies of the dynamical properties of solids The author has concentrated on fields in ME spectroscopy to which less attention has been paid in recent years Chapter 2 concentrates on structural phase transitions driven by lattice instability of solids Structural transitions show a fantastic variety in materials as well as in microscopic mechanisms The chapter presents a unified view of microscopic mechanisms of various kinds of phase transitions and shows the basic relationship between neutron scattering and generalized susceptibility

Mössbauer Spectroscopy in Materials Science 2008 Miroslav Mašlán,Radek Zboril,2008-11-19 The colloquium Mossbauer Spectroscopy in Materials Science 2008 was devoted to the application of the Mossbauer effect in various areas as material testing study of nanoscale systems metallurgy mineralogy chemistry and biology New developments of spectroscopy experimental technique were presented

Mössbauer Effect Methodology Irwin J. Gruverman,2013-04-17 This is the fifth volume of a series which provides acontinuing forum for publication of developments in Mossbauer effect methodology and of spectroscopy and its applications Mossbauer Effect Methodology Volume 5 records the proceedings of the Fifth Symposium on Mossbauer Effect Methodology The symposium was sponsored by the New England Nuclear Corporation and was centered on the themes of spectroscopy new applications and methodology The symposium was held in the Mercury Ballroom of the New York Hilton hotel on February 2 1969 Dr P A Flinn of Carnegie Mellon Institute was chairman of the afternoon and evening sessions About three hundred participants attended and this degree of interest leads us to anticipate a sixth symposium early in 1970 Elron Electronic Industries and Reuter Stokes Electronic Components Company demonstrated lines of equipment for Mossbauer investigators The evident high quality of the commercial instrumentation available is a tribute to the growth of Mossbauer technology and to the manufacturers
