English,2004-07-19 This book draws upon studies of the development of young children's mathematical and analogical reasoning in the United States and Australia to address a number of significant issues in the mathematical development of young children *Children's Books in Print* R R Bowker Publishing,Bowker,1999-12 *Resources in Education* ,1998 *Race in the Schools* Judith R. Blau,2003 Judith Blau's disturbing study presents strong evidence that our schools assumed by many to be an equalizing force in U.S. society are in fact racialized settings that reproduce white advantage to the detriment of all students. Drawing on rich longitudinal databases, Blau explores the values, activities, and educational experiences of a sample of young people born a decade or so after the 1964 Civil Rights Act was signed into law. She focuses on topics that are both important in students' lives and central in schooling: attitudes toward integrity and cheating, getting into trouble, interracial relations, learning and going to college. Her remarkable findings challenge many assumptions long held by researchers and policymakers. *Race in the Schools* combines an accessible style, sophisticated methodology, and clear policy relevance to create a seminal study of the pervasive consequences of race in the U.S. education system **Young Children** ,1995 *Math Advantage* ,1999 **CD-ROMs in Print** ,2002 *The Church Times* ,1904 *Journal of Nursery Education* ,1994 [A Survey of the City Schools of Marion, Illinois](#) Walter Scott Monroe,1924 *Teachers College Syllabi* Columbia University.
