Sustainable Leadership for Entrepreneurs and

Academics Wadim Strielkowski,2019-04-25 This proceedings volume focuses on the business models and higher education schemes in various countries that drive sustainable development Specifically it combines different approaches to issues such as social practices educational practices academic policies energy sustainable growth R D and global security from the point

of view of academics entrepreneurs policy makers and NGO representatives. Featuring selected contributions presented at the 2018 PRIZK International Conference on Entrepreneurial and Sustainable Academic Leadership ESAL2018 held in the Czech Republic this book combines contributions from both theory and practice providing a unique toolbox of policies for entrepreneurs and academics alike. Our quickly globalizing and stratifying world is marked by such processes as economic interconnectedness digitalization micro targeting and spillover causation. In such an environment there is a great need for strategies and tools for securing future sustainable development in both business and education. In this regard leadership is one of the crucial elements in achieving these goals seemingly and simultaneously. The goal of the 2018 PRIZK International ESAL Conference and the enclosed contributions is to explore different strategies and policies that drive sustainable development in entrepreneurial and academic leadership. Featuring research from fields such as business economics, education, social sciences, psychology and behavioral sciences this book is a useful reference for students, academics, scholars, researchers and policy makers in leadership, entrepreneurship, education and sustainability.

Fuzzy mathematical model and optimization in digital green innovation for industry 5.0 Shi Yin, Dragan Pamucar, Kifayat Ullah, Harish Garg, 2023-09-06

Optimal Transport Statistics for Economics and Related Topics Nguyen Ngoc Thach, Vladik Kreinovich, Doan Thanh Ha, Nguyen Duc Trung, 2023-10-31. This volume emphasizes techniques of optimal transport statistics but it also describes and uses other econometric techniques ranging from more traditional statistical techniques to more innovative ones such as quantiles in particular multidimensional quantiles, maximum entropy approach and machine learning. Applications range from general analysis of GDP growth, stock market and consumer prices to analysis of specific sectors of economics construction, credit and banking, energy, health, labor, textile, tourism, international trade to specific issues affecting economy such as bankruptcy effect of Covid 19 pandemic, effect of pollution, effect of gender, cryptocurrencies and the existence of shadow economy. Papers presented in this volume also cover data processing techniques with economic and financial application being the unifying theme. This volume shows what has been achieved but even more important are remaining open problems. We hope that this volume will inspire practitioners to learn how to apply state of the art techniques especially techniques of optimal transport statistics to economic and financial problems and inspire researchers to further improve the existing techniques and to come up with new techniques for studying economic and financial phenomena.
