Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity      *Kaplan GMAT 2004 with CD-ROM* ,2003 The GMAT is a computerized test offered year round by appointment Kaplan the trusted leader in test preparation offers a comprehensive guide to help business school applicants prepare for this challenging exam      **Software and CD-ROM Reviews on File** ,2003      *Scott Foresman-Addison Wesley Mathematics* ,2006-07-14 Scott Foresman Addison Wesley Mathematics Diamond Edition c 2008 components for Grade 2      New York Math: Math B ,2000      **Teaching Children Mathematics** ,2006      **Year/Glance Pacing Chrt Gr1 CA Math 02 HSP**,2001      **Electricity and Magnetism** ,2005      **Math Explorations and Applications** Stephen S.
