Math Matters A Pedagogy Of Remediation

Tony Brown, Henry Liebling

Math Matters A Pedagogy Of Remediation:

Math Matters Clement B. G. London,Chuka P. B. Ejiofor,2005-11-01 Mathematical Knowledge in Teaching Tim Rowland,Kenneth Ruthven,2011-01-06 The quality of primary and secondary school mathematics teaching is generally agreed to depend crucially on the subject related knowledge of the teacher. However there is increasing recognition that effective teaching calls for distinctive forms of subject related knowledge and thinking. Thus established ways of conceptualizing developing and assessing mathematical knowledge for teaching may be less than adequate. These are important issues for policy and practice because of longstanding difficulties in recruiting teachers who are confident and conventionally well qualified in mathematics and because of rising concern that teaching of the subject has not adapted sufficiently. The issues to be examined in Mathematical Knowledge in Teaching are of considerable significance in addressing global aspirations to raise standards of teaching and learning in mathematics by developing more effective approaches to characterizing assessing and developing mathematical knowledge for teaching

Developmental Education Preparation

Ajai Cribbs Simmons,2022-12-15 Developmental Education Preparation suggests faculty development that can be used for teaching developmental education and corequisites courses specifically in mathematics. Providing a look into the needs of students that may not be prepared for college level courses the premise of the book is to prepare the faculty as much as possible to handle a developmental course. Complete with techniques pedagogy instructional skills when combined all together this book can help with developing meaningful professional development on any campus across the nation. The interviews presented in this book provide the reality of some faculty of developmental mathematics education and revealed common trends in the needs and characteristics of corequisite courses. Based on the themes found professional development is suggested to aid in helping shift any negative components of those themes. The themes help better understand the needs of teaching these challenging courses. Student success should start with faculty making sure they are equipped with the tools and understanding of the students. Student's readiness starts with the faculty's readiness. Having the combined understanding of faculty and student needs can help to create a professional development plan that will enhance the developmental level mathematics courses in higher education

Towards a Socially Just Mathematics Curriculum

Tony Cotton,Manjinder Kaur Jagdev,Balbir Kaur,Pete Wright,2024-06-03 Drawing from many years of shared experiences in mathematics teaching and teacher education the authors of Towards a Socially Just Mathematics Curriculum offer a pedagogical model that incorporates and introduces learners to new cultures challenges stereotypes uses mathematics to discuss and act for social justice and develops a well rounded and socially just pedagogy. Readers will be encouraged to reflect on their own teaching practice and to identify areas for development creating a more inclusive and equal mathematics experience for all learners. Split into three distinct parts and filled with practical applications for the classroom this essential book explores Translating theory into practice by engaging in education for social justice. Applying this theory to teaching

and learning across the Early Years primary education and secondary education and Reflecting on professional practice and identifying ways forward to continue providing an inclusive and equitable mathematics learning experience for all students This is an essential read for those interested in providing an inclusive socially just mathematics education for their learners including teachers teaching assistants senior leaders and trainees within primary and secondary schools Higher Education: Handbook of Theory and Research J.C. Smart, William G. Tierney, 2003-04-30

Student Teacher's Perceptions of the Pre-Service Mathematics Programme in a Primary Teachers' College in Zimbabwe Barnabas Muyengwa, 2013 This case study investigated the perceptions of the third year student teachers of the first year pre service Mathematics programme at Seke Teachers College in Zimbabwe Student background characteristics of gender age teaching experience and Mathematics specialisation were the independent variables also investigated Data was collected from 278 third year students enrolled for the general Diploma in Education course using questionnaires with a five point Likert type 33 item rating scale and open ended items The data so collected were analysed both quantitatively and qualitatively The findings indicated that although the programme was able to provide students with a foundation in subject knowledge more could be done to improve on training in teaching methods and provision of resources From the variables investigated gender was found to have an effect on students perceptions of the programme but teaching experience was found to have no effect The possible relationship between the independent variables of age and Mathematics specialisation and the dependent variable of students perception of the programme was indicated in too few items to warrant a definite conclusion Implications for the improvement of the programme are that there is need for the college to revisit some aspects of the structure and organisation of the programme There is also need for further research involving all primary teachers colleges

Knowledge and Reasoning in Mathematical Pedagogy Deborah Ball, 1988 Technical Reports of the Teacher Assessment Project, School of Education, Stanford University, 1987 **The Really Useful Maths Book** Tony Brown, Henry Liebling, 2014-01-10
