Proceedings of the ASME Computers and Information in Engineering Division--2004, 2004 **Real Existence, Ideal Necessity** Robert Greenberg, 2008-12-10 Analytic philosophy has leveled many challenges to Kant's ascription of necessary properties and relations to objects in his Critique of Pure Reason Some of these challenges can be answered it is argued here largely in terms of techniques belonging to analytic philosophy itself in particular to its philosophy of language This Kantian response is the primary objective of this book It takes the form of a compromise between the real existence of the objects that we can intuit and that get our knowledge started dubbed initiators and the ideality of the necessary properties and relations that Kant ascribes to our sensible representations of initiators which he entitles appearances Whereas the real existence of initiators is independent of us and our senses the necessity of these properties and relations of appearances is due to their origins in the mind The Kantian compromise between real existence and ideal necessity is formulated in terms of David Kaplan's interpretation of de re necessity in his article Quantifying In his response to Quine's concern that a commitment to such a necessity leads to an acceptance of an unwanted traditional Aristotelian essentialism In addition the book first abstracts and then departs from its interpretation of Kant to provide a realistic account of the relation between existence and de re necessity Calibration of Rutting Models for Structural and Mix Design Harold L. Von Quintus, 2012 TRB's National Cooperative Highway Research Program NCHRP Report 719 Calibration of Rutting Models for Structural and Mix Design highlights proposed revisions to the Mechanistic Empirical Pavement Design Guide MEPDG and software to incorporate three alternative rut depth prediction models that rely on repeated load triaxial permanent deformation or constant height testing to provide the requisite input data **Advances in Transportation Geotechnics IV** Erol Tutumluer, Soheil Nazarian, Imad Al-Qadi, Issam I.A.
