

Mathematics Short Term Lesson Plan

Date	Year/Class
Relevant Q2T Standards:	
<p>Please list below one relevant standard that relates to your lesson and make it as different from the Aims in your lesson document. Early in your practice you might choose the standard randomly when later on you will be more intentional.</p>	
Context of Lesson:	
<p>Your description should explain how this lesson fits in with the sequence of lessons that relates to the particular year level you should indicate any issues during those the previous lesson.</p> <p>For example:</p> <p>"A number of children seem to have developed a misconception about and this lesson will attempt to address this by...."</p> <p>Should be a much more useful statement than:</p> <p>"This is the fourth lesson of five on fractions."</p> <p>This box is best completed in the period between the previous meeting Aims and this one.</p>	
Learning Objectives Mental/Oral:	Learning Objectives Main:
<p>These should not necessarily be linked directly from the NC Framework Programmes, or newly taught objectives are inappropriate to meet the specific needs of the children you are teaching.</p>	<p>It is useful for the teacher to consider if it would be appropriate that children independently identify achievement objectives in a simple document and should not be expected to, it is the possibility to define objectives closer together stages that can be achieved but the sense of ownership then deeper purchase of your aims.</p> <p>Consider any skills to further objectives that are important for the children to focus in order to be aware of opportunities for developing "deeper" understanding.</p>
Key Vocabulary:	Resources:
<p>You may find the NC Vocabulary Book very useful for identifying appropriate vocabulary.</p> <p>Please list key vocabulary that will accurately describe any terms that are new.</p>	<p>It should be useful to illustrate resources to help with identification for your lesson purposes. You could also list other relevant resources if other resources are appropriate for this lesson purpose.</p>
Mental/Oral (time):	Key Questions:
<p>It is good practice for this part of the lesson to relate to the main part of the lesson by presenting tasks that will be used in the function of the lesson.</p> <p>If your children are able then you should indicate the resources for your discussion.</p>	<p>These should be questions that you are going to use in the lesson. You might find it useful to use them later on to assess for the questions you ask in the lesson. The NC Vocabulary Book (page 4-6) may be helpful in helping to formulate questions.</p>
Main Activities (time):	Key Questions:
<p>This is the most important box on the plan and should be completed in detail.</p> <p>Your lesson should be introduction and the following activities that will take place. The number of activities should you choose to use should be as realistic as possible, ideally one focus group at a time will be working with one of the other children. Make a clear distinction between what you will be expecting, for example one group will be working on ... and what that group will be doing. Please make sure you provide them very clearly about what the groups will have to do.</p> <p>It will be useful to indicate in this box for each of the activities taking place.</p>	<p>On introduce the use of probing questions.</p> <p>These about the objectives, your questions might ask for children, in particular "incorrect" ones, and then you might follow them up. Whether you can try to avoid having yourself in a position where your answer is "That's all you need".</p> <p>Looking at the "errors and misconceptions" section of your medium-term plan may be helpful in helping you to formulate questions.</p>
Plenary (time):	
<p>This is a very important part of the lesson and needs to be planned thoroughly. Most of the time for mathematics is devoted this part of the lesson, to introduce learners to concepts or to address misconceptions. An evaluation of</p>	

Math Plans Lessons From The Field

**Indiana. Department of Public
Instruction**

Math Plans Lessons From The Field:

Math Plans Patricia Marshall,1997 This stimulating resource is packed with both direct instruction and exploring lesson plans that take both teachers and students to deeper levels of reasoning through positive experiences that deliver understanding The intriguing lessons in geometry measurement probability and statistics patterns and functions logic and number were written and taught by beginning teachers from the many resources available to them cooperating teachers and professors current books and periodicals videos and workshops The result is a collage of well prepared ready to use mathematically sound plans that give children the desire and the means to learn mathematics
