This book eliminates the need to take home prints or run around franchises, bookstores and libraries trying to find enough material. It also prevents you from overwhelming your kids with too many math drill worksheets. There are approximately 200 school days a year. Simply have your child complete ONE per day. Work is far easier when it is part of a routine, especially for kids. The One Sheet per Day program is an easy routine to start and maintain because it takes less than 20 minutes per day using basic skills your child already knows. Simply take one sheet from the book, ask your child to complete it in a quiet place and return it to you to check the answers, a painless routine for you and your child and instant feedback for both of you. Geared to follow most math curriculums, most kids can do the appropriate sheet on their own based on what they are learning at school. One Sheet A Day math practice drills will give your child practice they need to score higher on test day and build confidence in their math abilities.

At Home John Mighton, 2008-04 JUMP Junior Undiscovered Mathematical Prodigies, a nonprofit program that began life in 1998, has become an international phenomenon with pilot programs in the United States, Great Britain and elsewhere. Originally designed to teach math to children with everything from severe disabilities to a lack of self confidence, the JUMP method has proven equally useful for general students. The key to its enormous success is a step by step teaching method that isolates and describes concepts so clearly that anyone can understand them. Students build on their successes and soon are solving problems well above their grade levels. Now parents and caregivers can bring this innovative program home. This Grade 3 workbook has been completely revised to follow the current student worksheets used by JUMP tutors and classroom teachers. Each workbook includes an introduction by John Mighton that explains the thinking behind the program and provides suggested activities, worksheets carefully designed to enable children to move from one success to the next, a glossary of math terms and a selected answer key. Both practical and inspiring, JUMP at Home Grade 3 helps students not only learn to solve problems but to do so with confidence and enthusiasm.
