This book is written after meticulous review of the math questions on the tests released by College Board. This book contains over 200 solved examples and over 800 practice questions with detailed answer explanations. This book will prepare students on how to approach and quickly solve math questions on the SAT sections. This book is concise and is systematically organized as SAT question types. Each question type starts with relevant concepts as bullet points, things that students normally highlight, followed by examples and practice questions. The examples demonstrate concise and simple steps, usually one or two, to solve a question using mathematical concepts. There is no guessing and there are no shortcuts or tricks that only work on certain questions. This book contains the right amount of information to answer questions on the SAT. This book avoids overwhelming students with wordy information that is not required to solve questions or skip information that is necessary to solve questions. SAT is a registered trademark of the College Board, which is not affiliated in the publication of and does not endorse this book.

SAT Math Workbook ILEX Publications, Khalid Khashoggi, 2014-09-03. No matter what your background in mathematics, this book is designed to lead you to your ideal SAT score.
