All-in On AI Thomas H. Davenport, Nitin Mittal, 2023-01-24. A Wall Street Journal bestseller. A Publisher's Weekly bestseller. A fascinating look at the trailblazing companies using artificial intelligence to create new competitive advantage. From the author of the business classic *Competing on Analytics* and the head of Deloitte's US AI practice. Though most organizations are placing modest bets on artificial intelligence, there is a world class group of companies that are going all in on the technology and radically transforming their products, processes, strategies, customer relationships, and cultures. Though these organizations represent less than 1 percent of large companies, they are all high performers in their industries. They have better business models, make better decisions, have better relationships with their customers, offer better products and services, and command higher prices. Written by bestselling author Tom Davenport and Deloitte's Nitin Mittal, *All In on AI* looks at artificial intelligence at its cutting edge from the viewpoint of established companies like Anthem, Ping An, Airbus, and Capital One. Filled with insights, strategies, and best practices, *All In on AI* also provides leaders and their teams with the information they need to help their own companies take AI to the next level. If you're curious about the next phase in the implementation of artificial intelligence within companies or if you're looking to adopt this powerful technology in a more robust way yourself, *All In on AI* will give you a rare inside look at what the leading adopters are doing while providing you with the tools to put AI at the core of everything you do. Educational Assessments in the Age of Generative AI Wachira, Patrick W., Liu, Xiongyi, Koc, Selma, 2024-12-24 The rapid and profound permeation of generative AI technology into all aspects of modern society also changes the landscape of higher education and thus leads to a compelling call to harness the power of AI for transforming higher education. One of the most significant areas of opportunity offered by generative AI is in the assessment of learning. The goal of assessment is to foster learning especially essential for success beyond the classroom and this can only be possible with well designed assessments that have the potential for determining whether students have learned the content. By harnessing generative AI assessments can be designed that have the potential to support inquiry based learning and foster creativity all essential for the development of a deeper conceptual understanding of content. Educational Assessments in the Age of Generative AI contributes to the effort to bring generative AI to the forefront of assessing students learning by exploring how the use of generative AI tools and applications can transform and revolutionize assessment practices. Furthermore it is devoted to exploring the use of AI in assessments to measure knowledge skills and students abilities in order to prepare them for careers in the 21st century. Covering topic including academic integrity higher education and mathematics education this book is an excellent resource for educators higher education administrators policymakers information technology support professionals tests and assessment developers researchers scholars academicians professionals and more

Integrating Micro-Credentials With AI in Open Education Durak, Gürhan, Çankaya, Serkan, 2024-11-15 Micro credentials which offer smaller certifications for specific skills and competencies are becoming relevant in today s job market. When combined with artificial intelligence these credentials can be personalized and tailored to individual learners assessing their strengths and areas for improvement. AI can also facilitate the creation and management of these micro credential programs ensuring they meet industry demands and educational standards. Further exploration into this area may help enhance learner engagement while providing a flexible accessible pathway for individual skill development. Integrating Micro Credentials With AI in Open Education provides current insights into the rapidly evolving field of micro credentials with a particular focus on emerging technologies processes and applications. It offers an extensive exploration of micro credentials from various perspectives including their design development application in different educational and professional contexts and integration with cutting edge technologies like AI and MOOCs. This book covers topics such as distance learning higher education and learning analytics and is a useful resource for computer engineers education professionals curriculum designers scientists academicians and researchers
