## **Gardening Tips For Beginners:**

*Vertical Gardening Tips For Beginners* Timothy Tripp, 2013-05-05 Vertical gardening is the process of gardening that is done vertically or upward. While the traditional gardening process is gardening with plots on the ground, vertical gardening is a different approach to gardening as it aims to plant crops in a vertical position or standing position. This can either be done through hanging plots or with frameworks as long as plants are not planted on the ground like in traditional gardening. There are several advantages of vertical gardening. One vertical gardening is a great space saver. Since your garden is positioned vertically, it does not take up too much space in your backyard, giving room to more plants to be planted. Two vertical gardening is a very flexible type of gardening because it allows you to plant or to build a garden even in an area with limited space. For instance, if you are only gardening on your rooftop or you only have a very small backyard, it is possible for you to plant many crops through vertical gardening even with that limited space you have. If you want to build a vertical garden, there are several things you need to be aware of. First, you need to know how to build one, you need to know how to prepare the soil for a vertical garden, you need to know how to maintain your vertical garden, and you need to know how to control pests and keep them from destroying your plants. This way, the time, money, and effort you invested in building this garden won't be in vain. This book will discuss and reveal some of these helpful vertical gardening tips you need.

There's a little bit of pioneer spirit in all of us. We can't help it; it's in our blood. For some, this pioneer spirit shows itself in someone's determination to climb to the top of the corporate ladder. But for others, this pioneer spirit takes them back to their roots, literally giving them the desire to be self-sufficient to the greatest extent possible. If you are reading this book, you are most likely someone wanting to be more self-sufficient. Good for you! With the cost of food going higher and higher every week, literally and the nearly constant revelations of the negative effects of chemicals, processed foods, and other things we ingest, it's a shame more people aren't willing to do more to get back to the basics of providing for themselves.
