Messerschmitt Bf 109 F K Development Testing Production:

Messerschmitt BF 109 F-K Willy Radinger, Wolfgang Otto, 1999 As the Luftwaffe's standard fighter beginning in 1937 the Bf 109 was produced in large numbers and after the outbreak of the Second World War saw action over every front With this light high performance aircraft Professor Willy Messerschmitt had created a ground breaking design The Bf 109 had to remain in continuous development in order to keep pace with advances in Allied fighter design 1941 saw the advent of the Bf 109 F a clearly improved version which was soon replaced by the more powerful and better armed Bf 109 G The Bf 109 H high altitude fighter reached a ceiling of 14 000 meters and the Bf 109 K the most potent of all the variants of this fighter aircraft entered production in the last year of the war This is a complete summary of all versions from the Bf 109 F to K with many photographs some never before published and details

Luftwaffe Mistel Composite Bomber Units Robert Forsyth, 2015-09-20 The striking appearance of Luftwaffe's Mistel Composite attack aircraft might seem ridiculous to modern eyes but employed correctly these original fire and forget weapons were devastatingly effective as Allied sources testify This book draws on a wealth of first hand reports and revealing contemporary photographs to tell the full strange story of the Mistel units They were the product of a remarkable mix of desperation and innovation and were actually grounded in a pre war non military practise the mounting of one aircraft atop another was initially conceived to extend the ranges of passenger and mail carrying aircraft But as early as 1942 German planners saw the potential for use as a guided missile and by the end of the war the sight of a Ju 88 lashed to a Bf 109 or FW 190 fighter bearing down on an Allied target was not as rare as one might expect This is a comprehensive account of the Mistel units from their design and development through the first deployments at D Day to the last desperate missions against key bridges on the Oder and the Neisse in the final weeks of the war
