**Developments in Colorants for Plastics** Ian Christensen,2003 At a time when it is critical to many plastics processors to add value to products colorants are an essential part of the additives repertoire Plastics are often processed at very high temperatures and shear and products are exposed to heat and light Colorants must tolerate these conditions to function adequately This Rapra Review Report provides practical information for plastics processors with regard to colorant selection and the range of products and effects available The review is accompanied by around 400 abstracts from the Rapra Polymer Library database to facilitate further reading on this subject

*Coloring Technology for Plastics* Ronald M. Harris,1999-12-31 The papers in this anthology were presented during seven ANTEC and RETEC symposia between 1995 and 1998 and chronicle many of the advances in the plastics coloring technology field during that time span The unifying theme of the papers is creating more value The interactivity of the package design process has continued to demand
