Metaphysics Of Hyperspace

Hud Hudson

Metaphysics Of Hyperspace:

The Metaphysics of Hyperspace Hud Hudson,2005-11-24 Hud Hudson offers a fascinating examination of philosophical reasons to believe in hyperspace He begins with some stage setting discussions offering his analysis of the term material object noting his adherence to substantivalism confessing his sympathies regarding principles of composition and decomposition identifying his views on material simples material gunk and the persistence of material objects and preparing the reader for later discussions with introductory remarks on eternalism modality and recombination vagueness bruteness and the epistemic role of intuitions The subsequent chapters are loosely organized around the theme of hyperspace Hudson explores nontheistic reasons to believe in hyperspace in chapter 1 e g reasons arising from reflection on incongruent counterparts and fine tuning arguments theistic reasons in chapter 7 e g reasons arising from reflection on theistic puzzles known as the problem of the best and the problem of evil and some distinctively Christian reasons in chapter 8 e g reasons arising from reflection on traditional Christian themes such as heaven and hell the Garden of Eden angels and demons and new testament miracles In the intervening chapters Hudson inquires into a variety of puzzles in the metaphysics of material objects that are either generated by the hypothesis of hyperspace focusing on the topics of mirror determinism and mirror incompatibilism or else informed by the hypothesis of hyperspace with discussions of receptacles boundaries contact occupation and superluminal motion Anyone engaged with contemporary metaphysics will find much to stimulate them here

The Fall and Hypertime Hud Hudson,2014-06-26 Frequently alleged irreconcilable conflicts between science and religion are instead misdescribed battles concerning negotiable philosophical assumptions conflicts between metaphysics and metaphysics Hud Hudson provides a two stage illustration of this claim with respect to the putative inconsistency between the doctrines of The Fall and Original Sin and the deliverances of contemporary science The tension in question emerges through a study of the many forms the religious doctrines have assumed over the centuries and through a review of some well established scientific lessons on the origin and history of the universe and of human persons The first stage After surveying various paths of retreat which involve reinterpreting and impoverishing Original Sin and minimizing and dehistoricizing The Fall one version of moderate realism about the doctrines is articulated critically evaluated and found both consistent with contemporary science and suitable to play a crucial role in the theist's confrontation with the Problem of Evil The second stage Recent work in the philosophy of time and in the philosophy of religion provides intriguing support for a Hypertime Hypothesis a species of multiverse hypothesis distinctive for positing a series of successive hypertimes each of which hosts a spacetime block After arguing that the Hypertime Hypothesis is a genuine epistemic possibility and critically discussing its impact on a number of debates in metaphysics and philosophy of religion Hudson reveals a strategy for unabashed extreme literalism concerning The Fall and Original Sin which nevertheless has the extraordinary and delightful feature of being thoroughly consistent with the reigning scientific orthodoxy

Personal Identity and Resurrection

Georg Gasser,2016-09-17 What happens to us when we die According to Christian faith we will rise again bodily from the dead This claim raises a series of philosophical and theological conundrums is it rational to hope for life after death in bodily form Will it truly be we who are raised again or will it be post mortem duplicates of us How can personal identity be secured What is God's role in resurrection and everlasting life In response to these conundrums this book presents the first ever joint work of leading philosophers and theologians on life after death This is an impressive demonstration of interdisciplinary cooperation between philosophy and theology Various models are offered which depict what resurrection into an incorruptible post mortem body might look like Therefore this book is an indispensable resource for anyone interested in the doctrine of bodily resurrection be they philosophers theologians scholars in religious studies or believers interested in examining their faith

God and the Multiverse Klaas Kraay, 2014-11-13 In recent decades scientific theories have postulated the existence of many universes beyond our own The details and implications of these theories are hotly contested Some philosophers argue that these scientific models count against the existence of God Others however argue that if God exists a multiverse is precisely what we should expect to find Moreover these philosophers claim that the idea of a divinely created multiverse can help believers in God respond to certain arguments for atheism These proposals are of course also extremely controversial This volume collects together twelve newly published essays two by physicists and ten by philosophers that discuss various aspects of this issue Some of the essays support the idea of a divinely created multiverse others oppose it Scientific philosophical and theological issues are considered

Expanding Humanity's Vision Of God Robert Herrmann, 2009-08-15 How has our understanding of our world and our place in the universe changed

in recent decades through the momentous discoveries of science Do recent developments in the philosophy of science which place limitations on scientific knowing provide a more level playing field This collection of essays and sermons which have not been readily available before address these thought provoking questions The John Templeton Foundation sponsored an essay and sermon contest to convey an expanded vision of God one that is informed by recent discoveries of science on the nature of the universe and the place we have in the world These selections are the winners of that competition The book is divided into three sections Contemporary Science Raising Theological Questions New Visions of Theology and Historical and Philosophical Perspectives on the Science Religion Dialogue The essays cover such areas as physics theology cosmology origins and artificial intelligence There is another way to conceive our life together There is another way to conceive of our life in God but it requires a different worldview not a clockwork universe in which individuals function as discrete springs and gears but one that looks more like a luminous web in which the whole is far more than the parts In this universe there is no such thing as an individual apart from his or her relationships Every interaction between people and people between people and things between things and things changes the face of history Life on earth cannot be reduced to four sure fire rules It is an ever unfolding mystery that defies precise prediction Meanwhile in this universe there is no such thing as parts The whole is the fundamental unit of reality Barbara Brown Taylor Physics and Faith **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association,2007 List of members in v 1

Fallenness and Flourishing Hud Hudson,2021-04-01 Fallenness and Flourishing opens with defenses of the philosophy of pessimism first on secular grounds and then again on distinctively Christian grounds with reference to the fallenness of human beings It then details traditional Christian reasons for optimism with which this philosophy of pessimism can be qualified Yet even among those who accept the general religious worldview underlying this optimism many nevertheless willfully resist the efforts required to cooperate with God and instead pursue happiness and well being or flourishing on their own power On the assumption that we can acquire knowledge in such matters arguments are presented in favour of objective list theories of well being and the Psychic Affirmation theory of happiness and the question How are people faring in this quest for self achieved happiness and well being is critically investigated The unfortunate result is that nearly everywhere people are failing The causes of failure it is argued are found in the noetic effects of sin especially in inordinate self love and self deception but also in insufficient self love and such failure manifests both in widespread unhappiness and in that most misunderstood of the seven deadly sins sloth After a literary tour designed to reveal the many different ways that sloth can damage a life Hud Hudson provides a constructive proposal for responding to this predicament featuring the virtue of obedience This virtue is analysed illustrated and located in a new theory of well being *Hyperspace Helper* Stewart A.
