## **Meteor From The Moon:**

**Lunar Meteoroid Impacts and How to Observe Them** Brian Cudnik,2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938 In it he argued that the absence of observed fashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefed lunar atmosphere The paper suggested the possibility of systematic searches for such possible lunar meteors With these concepts in mind I was surprised to note a transient moving bright speck on the Moon on July 10 1941 It appeared to behave very much as a lunar meteor would except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity Thus the idea of systematic searches for both p sible lunar meteors and meteoritic impact fashes was born It was appreciated that much time might need to be expended to achieve any positive results Systematic searches were carried out by others and myself chiefly in the years 1945 1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers or ALPO *Meteor from the Moon* Harriette Sheffer Abels,1979-01-01 When the headquarters Astro orb goes out of orbit the members of spaceship EM 88 try a daring plan to put it back in place [Moon, Mars and Meteorites](#) Peter Joseph Adams,Peter Adams,1977 Discusses the nature and origin of the Moon Mars and meteorites and gives an account of the six moon landings from 1969 1972
