Ethnographic Discourse of the Other Panchanan

Mohanty,Ramesh C. Malik,Eswarappa Kasi,2008 This book primarily tries to bring out the analogy between the conceptual and methodological discourses on the theme of the other The term Other here refers to the oppressed sections of the society It may be dalits women indigenous or ethnic communities Since we are living in a multicultural and multilingual society we should share our views with others on a platform where issues of the marginalized people are addressed by different scholars following different methods and techniques Though there are various policies and plans for the welfare of the downtrodden hardly any change can be seen at the micro level structure of the society There are studies which highlighted the problems and ethos of the downtrodden sections but a majority of those studies neglected the marginalized groups Hence we felt the need to highlight the issues and concerns of these groups in a wider context and started thinking on the theme Ethnographic Discourse of the Other Conceptual and Methodological Issues This volume attempts to discuss and theorize the pragmatic concepts and issues related to the marginalized groups in contemporary societies in South Asia This book is interdisciplinary in nature and will be useful to scholars and students of Anthropology Sociology Linguistics Social Work Culture Studies Gender Studies and Philosophy It is widely applicable to all sections of the oppressed socially economically culturally academically politically and other wise Deconstructing Ethnography Graham Button,Andy Crabtree,Mark

Rouncefield, Peter Tolmie, 2015-10-15 This book aims to deconstruct ethnography to alert systems designers and other stakeholders to the issues presented by new approaches that move beyond the studies of work and work practice within the social sciences in particular anthropology and sociology The theoretical and methodological apparatus of the social sciences distort the social and cultural world as lived in and understood by ordinary members whose common sense understandings shape the actual milieu into which systems are placed and used In *Deconstructing Ethnography* the authors show how new calls are returning systems design to old and problematic ways of understanding the social They argue that systems design can be appropriately grounded in the social through the ordinary methods that members use to order their actions and interactions This work is written for post graduate students and researchers alike as well as design practitioners who have an interest in bringing the social to bear on design in a systematic rather than a piecemeal way This is not a how to book but instead elaborates the foundations upon which the social can be systematically built into the design of ubiquitous and interactive systems
