Methodology Of Economic Model Building:

Economic Model Building Frank Neal, Sir Robert Minshull Shone, 1976 Textbook on the theoretics and methodology of economic model construction discusses the use of the scientific method and creative thinking in the construction of dynamic models incl Economic policy models and econometrics models etc One page bibliography *The Methodology of Economic Model Building (Routledge Revivals)* Lawrence A. Boland, 2014-05-01 The major methodological task for modern economists has been to establish the testability of models Too often however methodological assumptions can make a model virtually impossible to test even under ideal conditions yet few theorists have examined the requirements and problems of assuring testability in economics In *The Methodology of Economic Model Building* first published in 1989 Lawrence Boland presents the results of a research project that spanned more than twenty years He examines how economists have applied the philosophy of Karl Popper relating methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper's falsificationism This title will prove invaluable to both students and researchers and represents a substantial contribution to debates about the scientific status of economics **The**

Methodology of Economic Model Building Lawrence A. Boland, 1991 Model building has been the backbone of modern economic theory over the last 25 years and the major methodological task for each model builder has been to establish the testability of each model developed Too often though seemingly innocent modelling assumptions can make a model virtually impossible to test even under ideal conditions yet few economic theorists have examined the methodological requirements and problems of assuring testability in economics Lawrence Boland considers how economists have applied Popper's views on the need for error detection and testability theories in science The methodological debates these theories have inspired are related to wider debates on empiricism and the truth status of models in the natural and social sciences He concludes by arguing that the practice of model building in economics reflects the methodological prescriptions of Samuelson more than the falsification theory usually attributed to Popper **On the Methodology of Economic Model Building** Lawrence

Arthur Boland, 1966 **Model Building in Economics** Lawrence A. Boland, 2014-09-15 Concern about the role and the limits of modeling has heightened after repeated questions were raised regarding the dependability and suitability of the models that were used in the run up to the 2008 financial crash In this book Lawrence Boland provides an overview of the practices of and the problems faced by model builders to explain the nature of models the modeling process and the possibility for and nature of their testing In a reflective manner the author raises serious questions about the assumptions and judgments that model builders make in constructing models In making his case he examines the traditional microeconomics macroeconomics separation with regard to how theoretical models are built and used and how they interact paying particular attention to the use of equilibrium concepts in macroeconomic models and game theory and to the

How Economists Model the World Into Numbers Marcel Boumans, 2004-12-17 Economics is dominated by model building therefore a comprehension of how such models work is vital to understanding the discipline This book provides a critical analysis of the economist's favourite tool and as such will be an enlightening read for some and an intriguing one for others

System-theoretic Methods in Economic Modelling S. Mitnik, E. Y. Rodin, 1989 The value of applying system theoretic concepts to economic modelling problems arises from the fact that it offers a unifying framework for modelling dynamic systems In addition to offering this powerful conceptual framework it provides a wide range of tools useful in applied work System theoretic techniques enter predominantly two stages of economic modelling efforts the stage of model construction and the stage of model application in accordance with the modelling The objective of this and subsequent volumes on System Theoretic Methods in Economic Modelling I is to initiate and or intensify dialogues between researchers and practitioners within and across the disciplines involved This first

volume brings together papers exhibiting a wide range of system theoretic techniques and applications to economic problems. The papers have been divided into two groups following roughly but not necessarily the above classification into the construction and application stages of economic modelling. The papers in the first group focus on the identification of dynamic and static systems while the papers in the second group address dynamic optimization problems.
