Markets For Water Potential And Performance:

Markets for Water K. William Easter, M.W. Rosegrant, Ariel Dinar, 2007-08-20 Markets for Water Potential and Performance dispels many of the myths surrounding water markets and gives readers a comprehensive picture of the way that markets have developed in different parts of the world It is possible for example for a water market to fail and for the transaction costs in water markets to be excessive Too often water trading is banned because the water resources have been developed with public funds and the water agencies do not want to lose control over water There is also a concern that poor farmers or households will be disadvantaged by water trading These concerns about public resources and the poor are not very different from those that have been voiced in the past about land sales The problem is that in many cases the poor already have limited access to resources but this limit is not due to water trading In fact water trading is likely to expand the access to water for many small scale farmers Markets for Water Potential and Performance provides an analytical framework for water market establishment It develops the necessary conditions for water markets and illustrates how they can improve both water management and economic efficiency Finally the book gives readers an up to date picture of what we have learned about water markets in a wide range of countries from the US to Chile and India

Sustainable Management of Water in Agriculture Issues and Policies - The Athens Workshop OECD, 1998-07-17 This Athens Workshop helped to illustrate what needs to be done to manage water sustainably in agriculture in particular through reviewing the experiences in OECD countries

Groundwater Development and Management Pradip K. Sikdar, 2018-07-27 This book deals with the challenges for efficient groundwater management with a focus on South Asia and India providing a balanced presentation of theory and field practice using a multidisciplinary approach Groundwater of South Asia is increasingly confronted with overuse and deteriorating quality and therefore requires urgent attention Management of the stressed groundwater systems is an extremely complex proposition because of the intricate hydrogeological set up of the region Strategies for sustainable management must involve a combination of supply side and demand side measures depending on the regional setting and socio economic situations As a consequence the challenges of efficient groundwater management require not only a clear understanding of the aquifer configuration but also demand for the development of a comprehensive database of the groundwater occurrences and flow systems in each hydrogeological setting In addition drilling and well construction methods that are appropriate to different hydrogeological formations need to be implemented as well as real time monitoring of the status of the groundwater use Also corrective measures for groundwater that is threatened with depletion and quality deterioration need to be installed Finally the legal framework of groundwater needs to be rearticulated according to the common property aspect of groundwater These challenges should revolve around effective groundwater governance by creating an atmosphere to support and empower community based systems of decision making and revisit the existing legal framework and groundwater management institutions by fostering community initiatives This book is relevant for academics

professionals administrators policy makers and economists concerned with various aspects of groundwater science and management

Water and Agriculture Sustainability, Markets and Policies OECD,2006-10-23 Explores how both governments and the private sector can expand the role of markets to allocate water used by all sectors and to get agricultural producers to account for the pollution that their sector generates *Pricing Irrigation Water* Yacov Tsur,2010-09-30 As globalization links economies the value of a country s irrigation water becomes increasingly sensitive to competitive forces in world markets Water policy at the national and regional levels will need to accommodate these forces or water is likely to become undervalued The inefficient use of this resource will lessen a country s comparative advantage in world markets and slow its transition to higher incomes particularly in rural households While professionals widely agree on what constitutes sound water resource management they have not yet reached a consensus on the best ways of implementing policies Policymakers have considered pricing water a debated intervention in many variations Setting the price right some say may guide different types of users in efficient water use by sending a signal about the value of this resource Aside from efficiency itself an important policy objective equity accessibility and implementation costs associated with the right pricing must be considered Focusing on the examples of China Mexico Morocco South Africa and Turkey *Pricing Irrigation Water* provides a clear methodology for studying farm level demand for irrigation water This book is the first to link the macroeconomics of policies affecting trade to the microeconomics of water demand for irrigation and in the case of Morocco to link these forces to the creation of a water user rights market This type of market reform the contributors argue will result in growing economic benefits to both rural and urban households *Conflict and Cooperation on Trans-Boundary Water Resources* Richard E. Just,Sinaia Netanyahu,2012-12-06 This book demonstrates what the discipline of economics has to offer as support for analyzing cooperation on management of trans boundary water resources It also considers what the discipline of economics has to acquire to become a more effective contributor to trans boundary water resource management given political legal social physical scientific and ecological realities This book has its genesis in a symposium of the International Water and Resource Economics Consortium held at Annapolis Maryland April 13 16 1997 The symposium was organized by the editors and the book contains papers presented at the symposium with subsequent revisions The symposium brought together both economists and agency management personnel for the purpose of discussing not only how economic tools apply to trans boundary water management but also of identifying the obstacles to making such tools useful and informative to politicians and negotiators in public decision making roles INTERNATIONAL VERSUS DOMESTIC TRANS BOUNDARY PROBLEMS Trans boundary water problems arise in many dimensions The two most important types of problems emphasized in this book are international and domestic interstate or interregional problems Cooperation on international problems is especially difficult because enforcement must be voluntary given the sovereignty of nations and the absence of an effective legal enforcement mechanism Agreements must be sustainable and self enforced if they are to have lasting

benefits Every negotiating country must be convinced it will receive benefits before it gives its consent to cooperation In the absence of enforceable agreements trans boundary i e **Southern California Water Markets** Brad D. Newlin,2000 Environment and Development Economics ,2002 Implementing Domestic Tradeable Permits Organisation for Economic Co-operation and Development,2002 Tradeable or transferable permits TPs are increasingly perceived as a cost effective policy instrument for pollution control and natural resources management and over the last few years there have been significant developments in the use of domestic TPs This book presents the proceedings of an OECD workshop held in September 2001 in Paris It looks at recent developments in the use of domestic TPs in new areas including climate change renewable energy transport solid waste management and water resources management It considers the policy issues involved in their use and reviews evaluations of earlier schemes It identifies key challenges in the design and use of such systems and attempts to link the past lessons to further research needs **Pricing Irrigation Water** Robert C. Johansson,2000 Getting prices right and allocating water efficiently will become increasingly important as demand for food and water increases and as water scarcity becomes more of a problem Pricing water efficiently will help meet the increasing demand but what is the best way to make pricing more efficient **Private Water Markets in Agriculture and the Effects of Risk, Uncertainty, and Institutional Constraints** Erenay Ann Hadjigeorgalis,2000 **Water Resources Impact** ,2005 **The World Bank Research Observer** ,1999 *World Bank Research Program* World Bank,1998 *Operations Research Models for Problems Concerning Natural Resources* ,2000 *Journal of Agricultural and Resource Economics* ,2004 Department Publications University of Minnesota.
