However conflict is not bad. How conflict is managed determines the eventual outcome. The eventual outcome could be good or bad. Unfortunately due to lack of proper conflict management skills most conflicts end up delivering bad outcome. Part I of this book delves into the nature of conflicts so that you are able to know and identify the various forms of conflict, how they arise and what motivates them. It begins by defining what conflict is and goes further to highlight key elements of conflict, various kinds of conflict, various causes of conflicts and rests with informing you why conflict is healthy. Both part II and part III dwell on the actual conflict management. Part II focuses on conflict assessment whereby it equips you with necessary skills to assess the nature of a given conflict, the conflicting parties and key stakeholders. It goes further to show you how to carry out conflict analysis, process design for conflict resolution process and write a report on your findings of the assessment. Part III equips you with the necessary skills required to carry out successful conflict resolution. It highlights two key processes involved in conflict resolution: consensus building and negotiation. It shows you how these two processes are interrelated and the various approaches to carry them out in order to reach a possible settlement. Part IV gives special emphasis on certain other kinds of conflicts that may not necessarily involve the entire process as indicated in part II and part III, which may require a more specialized approach and attention.
