Martian Enigmas:

Martian Enigmas Mark J. Carlotto, 1993-01-29 On the surface of Mars lies a formation that looks remarkably like a humanoid face Forever staring up into the vastness of space it has attracted our attention For some that is why it is there beckoning us to come and explore Others believe that it is simply an odd looking geological landform a formation carved over the ages by the random forces of nature It is our imagination and our desire to find other life in the universe that makes us see it as an intelligently crafted object Opinions about the possibility of life on Mars have changed over the years from Percival Lowell s canals to the dead planet image by the early Mariner missions to Mars to the enormous volcanoes great canyon systems and channels carved by water seen by Mariner 9 and Viking In the first edition of *The Martian Enigmas* Dr Mark J Carlotto presented a detailed analysis of the controversial Viking photographs The revised edition greatly expands on his early work containing new research results that add further support to the claim that these objects may be precisely what many scientists have sought for decades the first hard evidence that we are not alone *The Martian Enigmas* Mark Joseph Carlotto, 1991 On the surface of Mars lies a formation that looks remarkably like a humanoid face Forever staring up into the vastness of space it has attracted our attention For some that is why it is there beckoning us to come and explore Others believe that it is simply an odd looking geological landform a formation carved over the ages by the random forces of nature It is our imagination and our desire to find other life in the universe that makes us see it as an intelligently crafted object Opinions about the possibility of life on Mars have changed over the years from Percival Lowell s canals to the dead planet image by the early Mariner missions to Mars to the enormous volcanoes great canyon systems and channels carved by water seen by Mariner 9 and Viking In the first edition of *The Martian Enigmas* Dr Mark J Carlotto presented a detailed analysis of the controversial Viking photographs The revised edition greatly expands on his early work containing new research results that add further support to the claim that these objects may be precisely what many scientists have sought for decades the first hard evidence that we are not alone The Martian Enigmas Mark J. Carlotto, 1998 Mars Geological Enigmas Richard Soare, Susan Conway, Jean-Pierre Williams, Dorothy Oehler, 2021-05-23 *Mars Geological Enigmas* From the Late Noachian Epoch to the Present Day presents outstanding questions on the geology of Mars and divergent viewpoints based on varying interpretations and analyses The result is a robust and comprehensive discussion that provides opportunities for planetary scientists to develop their own opinions and ways forward Each theme opens with an introduction that includes background on the topic and lays out questions to be addressed Alternate perspectives are covered for each topic including methods observations analyses and in depth discussion of the conclusions Chapters within each theme reference each other to facilitate comparison and deeper understanding of divergent opinions Offers a transchronological view of the geological history of Mars addressing thematic questions from a broad temporal perspective Discusses outstanding questions on Mars from diverging perspectives Includes key questions and answers as well as a look ahead to which puzzles remain to be solved

Mars/Earth Enigma DeAnna Emerson, 1996 Astronomical Enigmas Mark Kidger, 2005-07-08 Astronomer Kidger has spent his career helping the general public understand the nature of the universe and astronomy In Astronomical Enigmas he offers answers to the questions he is asked most frequently **The Mars Mystery** Graham Hancock, 2010-08-11 An asteroid transformed Mars from a lush planet with rivers and oceans into a bleak and icy hell Is Earth condemned to the same fate or can we protect ourselves and our planet from extinction In his most riveting and revealing book yet Graham Hancock examines the evidence that the barren Red Planet was once home to a lush environment of flowing rivers lakes and oceans Could Mars have sustained life and civilization Megaliths found on the parched shores of Cydonia a former Martian ocean mirror the geometrical conventions of the pyramids at Egypt's Giza necropolis Especially startling is a Sphinx like structure depicting a face with distinguishable diadem teeth mouth and an Egyptian style headdress Might there be a connection between the structures of Egypt and those of Mars Why does NASA continue to dismiss these remarkable anomalies as a trick of light Hancock points to the intriguing possibility that ancient Martian civilization is communicating with us through the remarkable structures it left behind In exploring the possible traces left by the Martian civilization and the cosmic cataclysm that may have ended it The Mars Mystery is both an illumination of our ancient past and a warning that we still have time to heed about our ultimate fate *Mars as Viewed by Mariner 9*, 1974 *The Edinburgh Review*, 1896 *Mars and Its Mystery* Edward Sylvester Morse, 1906 **Mysteries of Space** Richard M. Rassmussen, Richard Michael Rassmussen, 1994 This introduction to astronomy explores some of the great unanswered questions about the universe

Mysterious Universe William R. Corliss, 1979 Our Astronomy Handbook covers much the same ground as the three preceding Astronomy Catalogs but in more detail For example the quotations are much more extensive Picture caption Unexplained rift in the zodiacal light Typical subjects covered The lost satellite of Venus Transient lunar phenomena Ephemeral earth satellites Venus radial spoke system Relativly contradicted Cosmological paradoxes Changes in light's velocity Vulcan the intramercurial planet Knots on Saturn's rings Bright objects near the sun The Sun's problematical companion star Sedimentary meteorites Life chemistry in outer space Planet positions and sunspots Publisher description

The Inner Planets Clark R. Chapman, 1977 America keeps a fine house Anatol Lieven writes but in its cellar there lives a demon whose name is nationalism In this controversial critique of America s role in the world Lieven contends that U S foreign policy since 9 11 has been shaped by the special character of our national identity which embraces two contradictory features One The American Creed is a civic nationalism which espouses liberty democracy and the rule of law It is our greatest legacy to the world But our almost religious belief in the Creed creates a tendency toward a dangerously messianic element in American nationalism the desire to extend American values and American democracy to the whole world irrespective of the needs and desires of others The other feature populist or what is sometimes called Jacksonian nationalism has its roots in an aggrieved embittered and defensive White America centered largely in the American South Where the Creed is optimistic and triumphalist Jacksonian nationalism is fed by a profound pessimism and a sense of personal social religious and sectional defeat Lieven examines how these two antithetical impulses have played out in recent US policy especially in the Middle East and in the nature of U S support for Israel He suggests that in this region the uneasy combination of policies based on two contradictory traditions have gravely undermined U S credibility and complicated the war against terrorism It has never been more vital that Americans understand our national character This hard hitting critique directs a spotlight on the American political soul and on the curious mixture of chauvinism and idealism that has driven the Bush administration

Extraterrestrial Life Tamara L. Roleff, 2001 From NASA s exploration into whether Mars s atmosphere might once have supported life to tabloid tales of UFO sightings and alien abductions the question of whether life exists on other planets is a fascinating one

Contributors to this volume examine both sides of the issue as they explore the scientific evidence first person accounts and conspiracy theories dealing with the existence of extraterrestrial life **Millions of Miles to Mars** Joseph W. Kelch,1995 Describes what it would be like to travel to Mars and explore that planet as part of a group of astronauts and summarizes what we now know about the planet and its characteristics **The Skeptical Inquirer** ,1988 **Journal of Scientific Exploration** ,1997 The official research journal of the Society for Scientific Exploration Provides a professional forum for presentation scrutiny and criticism of scientific research on topics outside the established disciplines of mainstream science A critical forum of rationality and observational evidence for the often strange claims at the fringes of science *Voices of the Rocks* Robert M. Schoch,Robert Aquinas McNally,1999 Could the Egyptian Sphinx have been built many centuries earlier than conventional history would have us believe Could the great natural disasters that propelled the evolution of life on Earth have played a dominant role as well in the rise and fall of civilizations Could Earth have been home to civilizations far greater in number and far older than orthodox researchers have suspected In *Voices of the Rocks* Dr Robert M Schoch examines these and other crucial questions about our past and shows how the answers can guide us in the future In 1990 Robert Schoch a scientist and tenured university professor traveled to Egypt and conducted geological testing to evaluate the accepted date for the construction of the Great Sphinx of Giza His research revealed that the Sphinx is actually thousands of years older than previously supposed a discovery that upended the standard history of ancient Egypt Following the intellectual trail uncovered by his redating of the Sphinx Schoch became convinced that we are in the midst of a profound scientific paradigm shift The predominant notion that our species inhabits a slow changing steady state planet is falling by the wayside Instead we are coming to see that the history of Earth all living beings and human civilizations comprises a series of stops and starts in which equilibrium abruptly ends during a sudden severe catastrophe like the extraterrestrial impact that initiated the extinction of the dinosaurs Meteors asteroids and comets are potential sources of such disasters as are shifts in Earth s axis movements of the continents volcanic eruptions and earthquakes According to Dr Schoch Earth s long catastrophic history has obscured and obliterated evidence of lost civilizations But the traces remain for those who know where to look and what to look for At its core *Voices of the Rocks* is the story of Schoch s own search his fascinating discoveries and the warnings we must heed if we wish to survive whatever catastrophes the future has in store for us
