Marxism And Domination:

Time, Labor, and Social Domination Moishe Postone, 1993-04-30 Moishe Postone undertakes a fundamental reinterpretation of Karl Marx's mature critical theory. He calls into question many of the presuppositions of traditional Marxist analyses and offers new interpretations of Marx's central arguments. He does so by developing concepts aimed at grasping the essential character and historical development of modern society and also at overcoming the familiar dichotomies of structure and action, meaning and material life. These concepts lead him to an original analysis of the nature and problems of capitalism and provide the basis for a critique of actually existing socialism. According to this new interpretation, Marx identifies the core of the capitalist system with an impersonal form of social domination generated by labor and the industrial production process, which are characterized as expressions of domination generated by labor itself and not simply with market mechanisms and private property. Proletarian labor and the industrial production process are characterized as expressions of domination rather than as means of human emancipation. This reinterpretation entails the form of economic growth and the structure of social labor in modern society to the alienation and domination at the heart of capitalism. This reformulation, Postone argues, provides the foundation for a critical social theory that is more adequate to late twentieth century capitalism.

Marxism and Domination Isaac D. Balbus, 1982 The Description for this book, *Marxism and Domination: A Neo-Hegelian Feminist Psychoanalytic Theory of Sexual, Political, and Technological Liberation*, will be forthcoming.

Time, Labor, and Social Domination Moishe Postone, 1996-07-13 In this ambitious book, Moishe Postone undertakes a fundamental reinterpretation of Marx's mature critical theory. He calls into question many of the presuppositions of traditional Marxist analyses and offers new interpretations of Marx's central arguments. These interpretations lead him to a very different analysis of the nature and problems of capitalism and provide the basis for a critique of actually existing socialism. According to this new interpretation, Marx identifies the central core of the capitalist system with an impersonal form of social domination generated by labor itself and not simply with market mechanisms and private property. Proletarian labor and the industrial production process are characterized as expressions of domination rather than as means of human emancipation. This reformulation relates the form of economic growth and the structure of social labor in modern society to the alienation and domination at the heart of capitalism. It provides the foundation for a critical social theory that is more adequate to late twentieth century capitalism.

The Discourse of Domination Ben Agger, 1992 *The Discourse of Domination* tackles nothing less than the challenge of giving critical theory a new grip on current problems and restoring the left's faith in the possibility of enlightened social change. Agger steers a course between orthodox Marxism and orthodox anti-Marxism, bringing the concepts of ideology, dialectic, and domination out of the academy and making them into a living medium of political self-expression.

Marxism and Law Hugh Collins, 1984 In this introduction to *Marxism and the Law*, Hugh Collins presents a unified and

coherent view of Marxism which he uses to examine the specific characteristics of legal institutions rules and ideals He pays particular attention to the place of ideology in law the distinction between base and superstructure and the destiny of law in a Communist society His principal theme is the Marxist critique of the ideal of the Rule of Law He argues that the main purpose of a Marxist theory of law is to expose the belief in the Rule of Law as being a subtle and pervasive ideology which serves to obscure the structures of class domination within the State The author frequently subjects the Marxist approach to criticism and he shows that many of the Marxist claims about law are unproven or misconceived The book is written in straightforward non technical language which requires no knowledge of either Marxism or law Marxism and Environmental Crises David Layfield,2008-03-10 How can Marxism help us understand the contemporary environmental situation How can Marxism help greens respond to this situation Marxism and Environmental Crises answers these questions by claiming that Marxism offers a uniquely useful means to understand the various environmental crises that affect the contemporary world The strength of Marxism the author claims lies in its ability to comprehend why capitalism produces environmental crises at this point in history and why the effects of environmental crises fall most heavily upon those already in the worst social and economic position The author argues that contemporary developments of Marxism offer the most effective way for greens to engage with political economy and with material social production on a deeper level Marxism demonstrates that capitalism is unique no other social form is quite like it because of its process of expansion of infinite growth in a finite world The book argues that the contradictions of infinite expansion in a finite environment has led to successive waves of dispossession as capital attempts to seize control of production and nature by the imposition of markets as mediators between societies and their environments The author then calls for greens to re engage with the critique of capitalism and with a politics of struggle for control of production as a means to socialize the interaction of human societies and their environments *Domination and Resistance* Daniel Miller,2005-06-27 The nature of power one of the central concerns in social science is the main theme of this wide ranging book Introducing a much broader historical and geographical comparative understanding of domination and resistance than is available elsewhere the editors and contributors offer a wealth of perspectives and case studies They illustrate the application of these ideas to issues as diverse as ritualized space the nature of hierarchy in non capitalist contexts and the production of archaeological discourse Drawing on considerable experience in promoting interaction between archaeology and other disciplines concerned with ideology power and social transformation the editors have brought together a stimulating book that will be of widespread interest amongst students of archaeology ancient history sociology anthropology and human geography *Marx and Critical Theory* Emmanuel Renault,2018-08-13 Marx and Critical Theory examines Marx s main philosophical political and social theoretical ideas Its purpose is twofold making sense of the concepts and theses of Marx and showing that they remain relevant for contemporary critical theory Part One focuses on Marx s conception of philosophy Part Two analyses the Marxian primacy of

the practical Part Three is devoted to Capital and the critique of political economy This book will be useful for those who want to deepen their understanding of Marx's main ideas as well as for those who want to clarify what is at stake in contemporary debates about the ways in which contemporary critical theory could or should refer to Marx

Marx and the Domination of Nature Reiner Grundmann, 1988

Marxism and Ideology Jorge Larraín, 1991

Marxism and Ecology Reiner Grundmann, 1991 In this book Grundmann argues that Marx's theory of human nature and his evolutionary thinking are cogent tools for understanding basic traits of industrial countries and the ecological problems they produce He challenges the widespread belief that the development of productive forces is by itself a threat to the environment arguing that only specific technologies not technology as such lead to environmental degradation He concludes that the pursuit of productivity and the development of a healthy environment need not be mutually exclusive

Marxist Politics Md. Ayub Mallick, 2022-12-15 This book deals with the main doctrines of Marxist politics Clearly and simply written the book explores the views of classical Marxists along with the findings of Western and Analytical Marxists It also shows a distinction between Marxist and non Marxist views on politics Their points of difference as well as their common roots are thus clearly accounted for Marxist politics is a coherent system of ideas and theories of class class struggle party revolution and the state developed in response to a series of major and interrelated changes the emergence of a capitalist economy the rise of the modern nation state and the development of modern science which transformed both the society and politics This book is intended to explore these ideas and theories Particular emphasis has been put on the ideas and views of critical Marxists in a separate chapter The book includes brief bibliographical details of major individual thinkers as well as an annotated bibliography for further reading Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan
