Shipbuilding & Shipping Record ,1919 **Japanese Military Strategy in the Pacific War** James B

Wood,2023-06-14 A historical exploration of how Japan could have implemented military tactics that would have altered how World War II ended In this provocative history James B Wood challenges the received wisdom that Japan's defeat in the Pacific was historically inevitable He argues instead that it was only when the Japanese military prematurely abandoned its original sound strategic plan to secure the resources Japan needed and establish a viable defensible perimeter for the Empire that the Allies were able to regain the initiative and lock Japanese forces into a war of attrition they were not prepared to fight Japanese Military Strategy in the Pacific War persuasively shows how Japan's army and navy had both the opportunity and the capability to have fought a different and more successful war that could have influenced the course and outcome of World War II It is therefore a study both of Japanese defeat and of what was needed to achieve a potential Japanese victory or at the very least to avoid total ruin Wood's argument does not depend on single individual historical events or dramatic accidents Instead it examines how familiar events could have become more complicated or problematic under different but nevertheless historically possible conditions due to changes in the complex interaction of strategic and operational factors over time Wood concludes that fighting a different war was well within the capacities of imperial Japan underscoring the fact that the enormous task of achieving total military victory over Japan would have been even more difficult if the Japanese had changed strategy and the Allies had not fought as skillfully as they did If Japan had traveled that alternate military road the outcome of the Pacific War could have differed significantly from history *Shipbuilding and Shipping Record* ,1913

The War for the Seas Evan Mawdsley,2019-09-24 A bold and authoritative maritime history of World War II which takes a fully international perspective and challenges our existing understanding Command of the oceans was crucial to winning World War II By the start of 1942 Nazi Germany had conquered mainland Europe and Imperial Japan had overrun Southeast Asia and much of the Pacific How could Britain and distant America prevail in what had become a war of continents In this definitive account Evan Mawdsley traces events at sea from the first U boat operations in 1939 to the surrender of Japan He argues that the Allied counterattack involved not just decisive sea battles but a long struggle to control shipping arteries and move armies across the sea Covering all the major actions in the Atlantic and Pacific oceans as well as those in the narrow seas this book interweaves for the first time the endeavors of the maritime forces of the British Empire the United States Germany and Japan as well as those of France Italy and Russia *The Technical Review* ,1919 **The Independent** ,1920
