## Metallization Of Polymers 2:

**Metallization of Polymers 2** Edward Sacher,2012-12-06 As the demands put on the polymer metal interface particularly by the microelectronics industry become more and more severe the necessity for understanding this interface its properties and its limitations becomes more and more essential This requires a broad knowledge of and a familiarity with the latest findings in this rapidly advancing field At the very least such familiarity requires an exchange of information particularly among those intimately involved in this field Communications among many of us in this area have made one fact quite obvious the facilities provided by existing organizations scientific and otherwise do not offer the forum necessary to accomplish this exchange of information It was for this reason that Jean Jacques Pireaux Steven Kowalczyk and I organized the first Metallization of Polymers a symposium sponsored by the American Chemical Society which took place in Montreal September 25 28 1989 the Proceedings from that symposium were published as ACS Symposium Series 440 1990 It is this same perceived lack of a proper forum and the encouragement of my colleagues that prompted me to organize this meeting so as to bring to the attention of the participants new instruments materials methods advances and particularly thoughts in the field of polymer metallization The meeting was designed as a workshop with time being made available throughout for discussion and for the consideration of new findings
