Metaphysics Of Natural Complexes:

Metaphysics of Natural Complexes Justus Buchler, 1990-01-01 During the past two decades Metaphysics of Natural Complexes has exerted a strong growing influence on the continuing development of contemporary philosophy. This new and expanded edition acknowledges this influence and brings together much material. Included are the previously published articles *On the Concept of the World* and *Probing the Idea of Nature* which Buchler wrote subsequent to *Metaphysics of Natural Complexes* as extensions and completions of the system. Previously unpublished work on the key concept of contour has also been added. In addition there are excerpts from Buchler's replies to his critics, a set of editors' notes to facilitate cross-referencing and an updated index. This work presents a bold and forceful metaphysics and general ontology. It provides a systematic framework for understanding the broadest features of the world and nature and for locating our understanding of human nature, selfhood and society as complexes in and of nature. Buchler's detailed analysis of identity, ordinality, nature, world and validation advance our understanding of the basic categories to be used in defining and exploring whatever is. Unlike other contemporary philosophers that confine themselves to narrowly defined problems in hermeneutics or theory of knowledge, Buchler is unrelenting in his drive toward a more encompassing perspective simultaneously combining interpretive precision with sheer breadth of vision. Metaphysics of Natural Complexes Justus Buchler, 1966

Naturalism's Philosophy of the Sacred Martin O. Yalcin, 2013-11-05 Naturalism's Philosophy of the Sacred Justus Buchler, Karl Jaspers and George Santayana offers an interpretation of the sacred based on the ordinal naturalism of Justus Buchler, one of the most important philosophers of the twentieth century whose work is experiencing a renaissance. This book seeks to find common ground between theists and atheists by arguing that religious beliefs should be retained because they provide a poetic response to nature's mysteries while also addressing the atheist's concerns regarding the tendency of religious believers to demonize nonbelievers and to idolize their own conceptions of the sacred. The heart of Martin O. Yalcin's argument is that religious violence can be traced to the belief that God is far more real and therefore far more valuable than nature. In contrast to this view he develops a philosophy of the sacred from the perspective of ontological parity which holds that all things are equally real. He argues that when the sacred is leveled to the plane of nature as one of its innumerable orders then the virtues of piety and charity replace the vices of demonization and idolization so evident in religions that insist on the utter incommensurability of God with respect to the created order. In the course of developing an aesthetic interpretation of the sacred Yalcin explores not only the metaphysical categories of Justus Buchler but also those of Karl Jaspers and George Santayana. The dialogue with Jaspers unearths the absolute otherness of the sacred as the intrinsically unethical dimension of any variant of theism. Having undermined the total absolution of the sacred Naturalism's Philosophy of the Sacred suggests an alternative aesthetic form of sacred engagement that piggybacks on Santayana's thoroughly natural poetic rendition of the sacred. This book will be of great value to students and scholars working in departments of religion.
