Methods of Cell Separation Nicholas Catsimpoolas,1917 Methods of Cell Separation Nicholas Catsimpoolas,1980-05-01 Microspheres: Medical and Biological Applications (1988) Alan Rembaum,Zoltan A. Tokes,2017-11-22 We have previously described the syntheses of both magnetic and nonmagnetic polymeric microspheres and we have reported their application in removal of neuroblastoma cells from normal cells in bone marrow in the separation of red blood cells and the separation of human B and T lymphocytes In the present study we describe a series of hydrophilic microspheres consisting of 1 poly HEMA and 2 a copolymer sequence of HEMA acrolein microspheres Current Catalog National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965-70 *Methods of Cell Separation* Nicholas Catsimpoolas,1977-12 Presently the need for methods involving separation identification and characterization of different kinds of cells is amply realized among immunologists hematologists cell biologists clinical pathologists and cancer researchers Unless cells exhibiting different functions and stages of differentiation are separated from one another it will be exceedingly difficult to study some of the molecular mechanisms involved in cell recognition specialization interactions cytotoxicity and transformation Clinical diagnosis of diseased states and use of isolated cells for therapeutic e.g immunotherapy or survival e.g. transfusion purposes are some of the pressing areas where immediate practical benefits can be obtained by applying cell separation techniques However the development of such useful methods is still in its infancy A number of good techniques exist based either on the physical or biological properties of the cells and these have produced some valuable results Still others are to be discovered Therefore the purpose of this open end treatise is to acquaint the reader with some of the basic principles instrumentation and procedures presently in practice at various laboratories around the world and to present some typical applications of each technique to particular biological problems To this end I was fortunate to obtain the contribution of certain leading scientists in the field of cell separation people who in their pioneering work have struggled with the particular problems involved in separating living cells and in some way have won **Organ Preservation for Transplantation** Armand M.
