**The American Architect and Building News**, 1876 **Work-Life Balance in Architecture** Igea Troiani, 2024-03-04 This book seeks to improve the work lives of architects of diverse demographics who do not fit or want to replicate the traditional 24/7 white male architect lifestyle

Aimed at a workforce whose life and career expectations have changed drastically in recent years it helps readers of different generations to make informed choices about their careers enabling students, educators and professionals to prioritise wellbeing and offer their design and practice voice to enhance a built environment for all. Work Life Balance in Architecture examines what it means to play the game of architecture to choose to study and pursue a career in architecture rather than another profession. The book shows the economic, social and professional structures within which architectural education and practice operate and reveals the impact of a corporate, neoliberal, big business mentality on wellbeing. After setting out the context exacerbating work-life imbalance, the book discusses the paths an architect may take whether this leads to a career in practice or not in architecture at all and how alternative gameplay moves can advantage or disadvantage those of different gender, class, ethnicity, race or age at different career stages. It concludes by examining how the places in which an architect works the time available to work and critiques of perpetual neoliberal economic growth can enhance the lives of all architects today. *Architectural Record of Design and Construction*, 1969 **American Architect and Building News**, 1876
