Metropolis Center And Symbol Of Our Times:

Metropolis Philip Kasinitz,1995 In an urban Society **Metropolis** Philip Kasinitz,1994-11-02 From its emergence at the end of the 18th century the modern way of life has been closely associated with the growth of great cities The essays in this collection represent some of the most significant attempts to understand the nature of the metropolis and its relationship with modern life in general The book includes both classic and contemporary works of sociological theory literary and architectural criticism ethnography polemics and historical work Yet in their very different ways each of the authors is trying to make sense of the sometimes frightening but always stimulating phenomenon of contemporary city life As such the essays speak to each other and to the controversies over the city what it is and what it should be that have emerged over the past century In addition to general works on the social and psychological nature of urbanism the book includes sections on the built environment and on public space **Challenges of Urban Education** Karen A. McClafferty,Carlos Alberto

Torres,Theodore R. Mitchell,2000-01-27 A supplemental text with a fresh bold edge Challenges of Urban Education includes a range of topics from quantitative analyses of student demographics to the description and analysis of urban high school students creative writing The book bridges the dualisms of local and global theory and practice and structure and agency It furthers the advancement of the new sociology of education by making connections between the social context of urban schooling and the lives of the individuals who are affected by it Contributors include Michael W Apple Anthony Gary Dworkin Pamela Fenning Harry Handler David Keiser Karen A McClafferty Peter McLaren Roslyn Arlin Mickelson Theodore R Mitchell Raymond A Morrow Marianela Parraga Margaret K Purser Ayman Sheikh Hussin Sid Thompson Laurence A Toenjes Carlos Alberto Torres Eugene Tucker Amy Stuart Wells Geoff Whitty and Jim Wilczynski Dance in the City Helen

Thomas,1997-07-21 This exciting new and original collection locates dance within the spectrum of urban life in late modernity through a range of theoretical perspectives It highlights a diversity of dance forms and styles that can be witnessed in and around contemporary urban spaces from dance halls to raves and the club striptease from set dancing to ballroom dancing to hip hop and swing and to ice dance shows from the ballet class to fitness aerobics and art dance which situates itself in a dynamic relation to the city *Experiencing Cities* Mark Hutter,2020-10-21 The fourth edition of Mark Hutter s *Experiencing Cities* examines cities and larger metropolitan areas within a truly global framework lending readers much to understand and appreciate about the variety of urban structures and processes and their effect on the everyday lives of people residing in cities Beginning with the emergence of the first urban centers and continuing to examine the present day and the future of smart cities this book explores the changing cultural and domestic character of the metropolis and offers readers a complete historical and theoretical overview of municipal life The new edition seamlessly integrates issues of gender race ethnicity sexuality and class in its examination of city and suburban life and further extends the Chicago School of Sociology perspective by combining its traditions with a distinct social psychological orientation derived from symbolic

interaction and macro level examination of social organization social change and power in the urban context With this strong and sweeping interdisciplinary approach the new edition of *Experiencing Cities* will continue to enrich students understandings of urban life and offer new forward looking perspective to those working in the fields of urban sociology history politics geography and the arts

New York in Cinematic Imagination Vojislava Filipcevic Cordes, 2020-06-11

New York in Cinematic Imagination is an interdisciplinary study into urbanism and cinematic representations of the American metropolis in the twentieth century It contextualizes spatial transformations and discourse about New York during the Great Depression and the Second World War examining both imaginary narratives and documentary images of the city in film The book argues that alternating endorsements and critiques of the 1920s machine age city are replaced in films of the 1930s and 1940s by a new critical theory of agitated urban modernity articulated against the backdrop of turbulent economic and social settings and the initial practices of urban renewal in the post war period Written for postgraduates and researchers in the fields of film history and urban studies with 40 black and white illustrations to work alongside the text this book is an engaging study into cinematic representations of New York City

The American Metropolis Hans Krabbendam, Marja Roholl, Tity de Vries, 2001

The complexities of the American metropolis have turned out to be pre eminently suited for interdisciplinary research Thanks to an ongoing set of changes in research approach and method the past twenty years have been particularly fruitful for the field of urban studies Meta narratives have given way to fragmentation and fixed notions of disciplinarity have been challenged by new sub cultural paradigms The contributions in this volume map the main elements of the American urban experience from the late nineteenth to the end of the twentieth centuries offering a multidisciplinary profile of their development representation and transatlantic impact Sometimes the approach is traditional fitting into the paradigms of urban corruption or dynamic modernity but more often the authors apply new approaches focussing on gender race class representation or the construction of social identities Together the articles in this volume reflect the latest scholarship in the broad field of urban studies

Recombinant Urbanism David Grahame Shane, 2005-06-17

This book provides a simple but comprehensive framework for the emerging academic discipline of urban design from its origins in Europe and America to contemporary issues of imagery finance and marketing in an age of globalisation There is currently no contemporary textbook for urban design that includes a general history and theory of the subject Internationally urban design is more and more becoming a core subject taught in architecture schools The AIA US and the RIBA UK both require undergraduates and graduates to study the urban dimension of architectural design On a wider scale in Europe the EU is developing a common

architectural curriculum which includes an urban component for under graduates The situation is similar in schools across Asia and Australia Aimed at both students and teachers this book provides a simple and accessible framework from the origins of urban design and the main techniques developed to deal with the design of fragments of cities to participatory planning processes codes imagery finance and marketing Finally it proposes an innovative vision of contemporary practice based on the work of leading actors and projects in the field This book is set to become the key textbook at undergraduate and graduate levels It is written in an accessible and direct tone and highly illustrated with many colour and black and white diagrams It includes a general history and theory of urban design and provides an up to date account of contemporary urban conditions Praise for Recombinant Urbanism Documents a major intellectual advance eagerly awaited by academics and practitioners all around the world should become a standard text for schools of architecture and urbanism Leon Van Schaik Innovation Professor of Architecture RMIT Australia both unique and instrumentally positive The book is the result of many years of research and writing and is a small masterpiece in urban studies It has already proved its worth in the teaching of urban studies at Columbia the AA the Bartlett School and Cooper Union to mention only a few of the universities where Dr Shane has had a powerful influence It is indeed one of the very best manuscripts I have read in the field in the last few years Anthony Vidler Professor and Dean Irwin S Chanin School of Architecture Cooper Union New York USA I can say without hesitation that I fully endorse Grahame s work the issues it covers are highly topical and such a book would indeed be widely read by architecture students urban designers and planners Colin Fournier Professor of Architecture again Shane has made important urban theories and thinking more widely available to an international student audience The legacy the book will have will be in convincing people that the design of cities matters not in the overbearing and over controlling sense of new urbanism but in reinforcing the multiple possibilities of contemporary life Brian McGrath Adjunct Associate Professor of Architecture Columbia University USA
