Metropolitan Phoenix Place Making And Community Building In The Desert:

Metropolitan Phoenix Patricia Gober,2013-02-12 Inhabitants of Phoenix tend to think small but live big They feel connected to individual neighborhoods and communities but drive farther to get to work feel the effects of the regional heat island and depend in part for their water on snow packs in Wyoming In Metropolitan Phoenix Patricia Gober explores the efforts to build a sustainable desert city in the face of environmental uncertainty rapid growth and increasing social diversity Metropolitan Phoenix chronicles the burgeoning of this desert community including the audacious decisions that created a metropolis of 3 6 million people in a harsh and demanding physical setting From the prehistoric Hohokam who constructed a thousand miles of irrigation canals to the Euro American farmers who converted the dryland river valley into an agricultural paradise at the end of the nineteenth century Gober stresses the sense of beginning again and building anew that has been deeply embedded in wave after wave of human migration to the region In the early twentieth century the so called health seekers asthmatics arthritis and tuberculosis sufferers arrived with the hope of leading more vigorous lives in the warm desert climate while the postwar period drew veterans and their families to the region to work in emerging electronics and defense industries Most recently a new generation of elderly seeking active retirement has settled into planned retirement communities on the perimeter of the city Metropolitan Phoenix also tackles the future of the city The passage of a recent transportation initiative efforts to create a biotechnology incubator and growing publicity about water shortages and school funding have placed Phoenix at a crossroads forcing its citizens to grapple with the issues of social equity environmental quality and economic security Gober argues that given Phoenix's dramatic population growth and enormous capacity for change it can become a prototype for twenty first century urbanization reconnecting with its desert setting and building a multifaceted sense of identity that encompasses the entire metropolitan community

Phoenix's Greater Encanto-Palmcroft Neighborhood G.G. George and Leigh Conrad,2014 The Encanto Palmcroft neighborhood in central Phoenix was created in the twilight of the City Beautiful Movement a philosophy that supported beautiful surroundings to promote moral and social order Even in the 21st century this neighborhood maintains its integrity and significance due to the participation of residents who realize its historic importance

Governing Metropolitan Regions in the 21st Century Donald Phares,2015-01-28 While government provides the structure of public leadership governance is the art of public leadership This timely book examines current trends in metropolitan governance issues It analyzes specific cases from thirteen major metropolitan regions in the United States Canada and Mexico all woven together by an overall framework established in the first three chapters The distinguished contributors address such governance issues as city county consolidation local federal coordination annexation and special districting and private contracting with special attention to lessons learned from both successes and failures As urban governance innovations have clearly outpaced urban government structures in recent years the topics covered here are especially relevant

Agrarian Landscapes in Transition Charles L. Redman,David R.

Foster,2008-07-18 Agrarian transformations represent the most pervasive alteration of the Earth's terrestrial environment over the past 10 000 years Using North American examples the book traces compares and contrasts the introduction spread and abandonment of agriculture at six US long term ecological research LTER sites Indeed lessons from these examples apply more broadly to inform socio ecological studies land use options conservation strategies restoration initiatives and urban planning

Resilience in Ecology and Urban Design S.T.A. Pickett, M.L. Cadenasso, Brian McGrath, 2013-01-13

The contributors to this volume propose strategies of urgent and vital importance that aim to make today's urban

environments more resilient Resilience the ability of complex systems to adapt to changing conditions is a key frontier in

ecological research and is especially relevant in creative urban design as urban areas exemplify complex systems With

something approaching half of the world's population now residing in coastal urban zones many of which are vulnerable both

to floods originating inland and rising sea levels making urban areas more robust in the face of environmental threats must

be a policy ambition of the highest priority The complexity of urban areas results from their spatial heterogeneity their

intertwined material and energy fluxes and the integration of social and natural processes All of these features can be altered

by intentional planning and design The complex integrated suite of urban structures and processes together affect the

adaptive resilience of urban systems but also presupposes that planners can intervene in positive ways As examples

accumulate of linkage between sustainability and building landscape design such as the Shanghai Chemical Industrial Park

and Toronto's Lower Don River area this book unites the ideas data and insights of ecologists and related scientists with

those of urban designers It aims to integrate a formerly atomized dialog to help both disciplines promote urban resilience

Urban Geomorphology Mary J Thornbush, Casey D. Allen, 2018-07-17 Urban Geomorphology Landforms and Processes in

Cities addresses the human impacts on landscapes through occupation urbanization and development as a contribution to

anthropogenic geomorphology or anthropogeomorphology This includes a focus on land clearance conservation issues

pollution decay and erosion urban climate and anthropogenic climate change These topics as well as others are considered to

shed more light on the human transformation of natural landscapes and the environmental impacts and geomorphological

hazards that environmental change can encompass Its multidisciplinary approach is appropriate for audiences from a range

of disciplines and professions from geologists conservationists and land use planners to architects and developers Urban

Geomorphology not only transcends disciplines but also covers varied spatial temporal frameworks and presents a diverse set

of approaches and solutions to human impacts and geomorphological hazards within urban landscapes Features a cross disciplinary perspective highlighting the importance of the geosciences to environmental science engineering and public policy Focuses on the built environment as the location of concentrated human impacts and change Provides an international scope including case studies from urban areas around the world **New American City** Heather Sealy Lineberry,2006

Metropolitan Home ,1995 Disappearing Desert Janine Schipper,2008 Phoenix Arizona is one of the fastest growing metropolitan areas in the United States The city's expansion at the rate of one acre per hour comes at the expense of its Sonoran Desert environment For some residents the American Dream has become a nightmare In this provocative book Janine Schipper examines the cultural forces that contribute to suburban sprawl in the United States Focusing on the Phoenix area she examines sustainable development in Cave Creek various master planned suburbs and the Salt River Pima Maricopa Indian Reservation to explore suburbanization and ecological destruction She also explains why sprawl continues despite the heavy toll it takes on the environment Schipper gives voice to community members who have experienced the pressures of sprawl and questioned fundamental assumptions that sustain it She presents the perspectives of the many players in the sprawl debate from developers and politicians to environmentalists and property rights advocates not merely to document the phenomenon but also to reveal how seemingly natural ways of thinking about the land are influenced by cultural forces that range from notions of a rational society to the marketing of the American Dream **Disappearing Desert**

speaks to land use dilemmas nationwide and shows that curtailing suburban development requires both policy shifts and new ways of relating to the land For anyone seeking to understand the cultural basis for rampant development this book uncovers the forces that drive sprawl and searches for solutions to its seeming inevitability **Growth in Arizona** ,1998
