Janowitz,1991-05-28 In the four decades following the end of World War II Morris Janowitz 1919 88 published major works in macrosociology urban and political sociology race and ethnic relations and the study of armed forces and society His research was deeply rooted in the traditions of philosophical pragmatism and the Chicago school of sociology influences which led him to reject grand theories and mechanistic explanations of social life Yet he remained confident in the capacity of sociological reason to come to grips with central aspects of the human condition On the basis of his studies Janowitz came to believe that the transition from early to advanced industrial society radically altered institutional organization to make democratic social control more difficult though not impossible to achieve The task of his pragmatic sociology was to identify fundamental trends in the social organization of industrial societies to indicate their substantive implications for social control and to clarify realistic alternatives for institution building which would strengthen the prospects for maintaining liberal democratic regimes In this volume James Burk selects from Janowitz s scholarly writings to provide a comprehensive overview of his wide ranging interests Organized to demonstrate the common logic of inquiry and substantive unity of Janowitz s contribution to several subfields of sociology the collection includes analyses of the concept of social control ethnic intolerance and hostility citizenship in Western societies models for urban education and the professionalization of military elites Burk provides a richly detailed critical account of Janowitz s intellectual development placing his writings in historical context and showing their continuing relevance for sociological research Useful to both students and specialists the volume is an important source for the ideas and methods of one of sociology s leading figures **Catalog of Copyright Entries.**

Anthropology of Migration and Multiculturalism Steven Vertovec, 2013-09-13 The field of anthropology of migration and multiculturalism is booming Throughout its hundred odd year history studies of migration and diverse or plural societies have arguably been both marginal and central to the discipline of Anthropology However recent years have witnessed the rapid growth of

anthropological studies concerning these topics This has particularly been the case since the 1970s when anthropologists developed a keen interest in the subject of ethnicity especially in post migration communities Since the 1990s migrant transnationalism has become one of the most fashionable topics There is still much to do in research and theory surrounding this field not least with regard to contemporary public debates around multiculturalism immigration and integration policy This book presents essays pointing toward a number of possible new directions both theoretical and methodological for anthropological inquiry into migration and multiculturalism including innovative ways of examining diversity discourses urban conditions social complexities scales of analysis transnational marriages entangled politics and interwoven cultures This book was published as a special issue of the Ethnic and Racial Studies *The State of Sociology* James F.
