Spatial Planning and Governance Mark Tewdwr-Jones, 2017-08-24 A major new introduction to the UK planning system It outlines the evolution and use of the new spatial planning approach which is increasingly adopted at all levels of the UK planning system from European through to the national regional sub regional and local level    *Contemporary Issues in Regional Planning* John Glasson, 2017-11-01 This title was first published in 2002 Regional planning and government in the UK is undergoing a period of tremendous activity with a wide range of new policies innovative techniques and experiments being tested This volume provides an overview of developments describing and analyzing the legislative political and economic contexts within which changes are occurring and assessing the continuing difficulties that face planners and others operating in the new arrangements for regional planning    **The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for
