**13497: LLL Mi Cuerpo (My Body) Spanish Teacher Guide Book**, 2011-10-15 *Interoception, Contemplative Practice, and Health* Norman Farb, Catherine Kerr, Wolf E. Mehling, Olga Pollatos, 2017-02-07 There is an emergent movement of scientists and scholars working on somatic awareness interoception and embodiment This work cuts across studies of neurophysiology somatic anthropology contemplative practice and mind body medicine Key questions include How is body awareness cultivated What role does interoception play for emotion and cognition in healthy adults and children as well as in different psychopathologies What are the neurophysiological effects of this cultivation in practices such as Yoga mindfulness meditation Tai Chi and other embodied contemplative practices What categories from other traditions might be useful as we explore embodiment Does the cultivation of body awareness within contemplative practice offer a tool for coping with suffering from conditions such as pain addiction and dysregulated emotion This emergent field of research into somatic awareness and associated interoceptive processes however faces many obstacles The principle obstacle lies in our 400 year Cartesian tradition that views sensory perception as epiphenomenal to cognition The segregation of perception and cognition has enabled a broad program of cognitive science research but may have also prevented researchers from developing paradigms for understanding how interoceptive awareness of sensations from inside the body influences cognition The cognitive representation of interoceptive signals may play an active role in facilitating therapeutic transformation e g by altering context in which cognitive appraisals of well being occur This topic has ramifications into disparate research fields What is the role of interoceptive awareness in conscious presence How do we distinguish between adaptive and maladaptive somatic awareness How do we best measure somatic awareness What are the consequences of dysregulated somatic interoceptive awareness on cognition emotion and behavior The complexity of these questions calls for the creative integration of perspectives and findings from related but often disparate research areas including clinical research neuroscience cognitive psychology anthropology religious contemplative studies and philosophy **Looking Within** Nancy Morejón, 2003 The African Cuban poet Nancy Morejón set out at a young age to explore the beauty and complexities of the life around and within her Themes of social and political concern loyalty friendship and family African identity women's experiences and hope for Cuba's future all found their way into her poems through bold metaphor and tender lyricism This panoramic anthology selected from ten volumes of Morejón's work and organized by theme contains some poems that have already been acclaimed in several languages others that are less known and some never before published Overall they present to Morejón's readership an enhanced broader and updated spectrum of her poetry in a Spanish English edition Although Morejón does not sympathize as much with intellectualized feminism as with street feminism the kind that erupts with force as it confronts daily life her poems illuminate issues in women's existence Without intending to she has revitalized contemporary Caribbean feminist literary discourse One can find in her work the tensions between colonizer and colonized

dominator and dominated and at the same time enjoy the sheer beauty of images depicting suffering strength and hope
