Mapping Decline Colin Gordon,2014-09-12 Once a thriving metropolis on the banks of the Mississippi St Louis Missouri is now a ghostly landscape of vacant houses boarded up storefronts and abandoned factories The Gateway City is by any measure one of the most depopulated deindustrialized and deeply segregated examples of American urban decay Not a typical city as one observer noted in the late 1970s but like a Eugene O'Neill play it shows a general condition in a stark and dramatic form Mapping Decline examines the causes and consequences of St Louis's urban crisis It traces the complicity of private real estate restrictions local planning and zoning and federal housing policies in the white flight of people and wealth from the central city And it traces the inadequacy and often sheer folly of a generation of urban renewal in which even programs and resources aimed at eradicating blight in the city ended up encouraging flight to the suburbs The urban crisis as this study of St Louis makes clear is not just a consequence of economic and demographic change it is also the most profound political failure of our recent history Mapping Decline is the first history of a modern American city to combine extensive local archival research with the latest geographic information system GIS digital mapping techniques More than 75 full color maps rendered from census data archival sources case law and local planning and property records illustrate in often stark and dramatic ways the still unfolding political history of our neglected cities *Subject Catalog* University of California, Berkeley.
