New Philosophies of Social Science: Realism, Hermeneutics and Critical Theory William Outhwaite, 1987-12-08 The demise of empiricist philosophies of science has contributed to the current disarray of philosophy in the social sciences This book argues that a realist analysis of the structures and processes which make up the social world can provide a way out of its present impasse These processes ranging from the interpersonal negotiation of meaning to the constraining influence of administrative or market structures cannot be understood as mere constructs either in the minds of the theorist or of the social factors themselves since they actually generate the social world as we know it The author develops some implications of this approach and presents a realist view of some of the principal theoretical traditions and controversies within sociology and other social sciences

Continental Philosophy of Social Science Yvonne Sherratt, 2005-10-17 Continental Philosophy of Social Science demonstrates the unique and autonomous nature of the continental approach to social science and contrasts it with the Anglo American tradition Yvonne Sherratt argues for the importance of an historical understanding of the Continental tradition in order to appreciate its individual humanist character Examining the key traditions of hermeneutic genealogy and critical theory and the texts of major thinkers such as Gadamer Ricoeur Derrida Nietzsche Foucault the Early Frankfurt School and Habermas she also contextualizes contemporary developments within strands of thought stemming back to Ancient Greece and Rome Sherratt shows how these modes of thinking developed through medieval Christian thought into the Enlightenment and Romantic eras before becoming mainstays of twentieth century disciplines Continental Philosophy of Social Science will serve as the essential textbook for courses in philosophy or social sciences

Reappraising European IR Theoretical Traditions Knud Erik Jørgensen, Audrey Alejandro, Alexander Reichwein, Felix Rösch, Helen Turton, 2017-11-14 This book is about European IR theoretical traditions their origins and key figures Theorizing is among the most important activities that take place within scientific disciplines Scholars therefore routinely talk debate about the discipline of IR and its theories theories are often used to form the pedagogical backbone of IR and theories are also a key part of scholarly identities Over time theories crystalize in to schools of thought strands of theorizing and theoretical traditions This book and the volumes that will follow focus on the origins and trajectories of theoretical traditions and key figures of IR thought in Europe in the 20th Century The authors are situated in

Europe and it is thus the origins and trajectories of European theoretical traditions its intellectual history and contemporary forms of theoretical knowledge today that are on the agenda In order to achieve this ambitious aim we opt for a transnational sociological history approach thus going beyond the national lens through which IR has been predominantly studied The series will have an integrative function and contribute to a globalized discourse on IR as a discipline The key benefits of this first volume is that it outlines IR theoretical traditions for the first time ever provides a novel framework for exploring IR s theories and contributes to define and strengthen the European identity of IR This book is an invaluable resource for scholars of IR
