The Physiology of the Compound Eyes of Insects and Crustaceans Sigmund Exner, 1988-12-22 Exner's classic monograph describes the basic optical mechanisms in operation in compound eyes and despite the passage of time still remains a definitive work Although his findings were seriously questioned during the modern revival of interest in compound eyes all his major discoveries have now been validated The principle of the lens cylinder and the elucidation of the

mechanics of apposition and superposition optics are amongst his outstanding contributions. It also includes a broad survey of the optics and anatomy of the eyes of many insect and crustacean species and the first explanation for the phenomena of pseudopupils and eyeglow. It has been faithfully translated from the original with annotations to aid the reader. The new edition with a foreword by the late Karl von Frisch also includes a concise illustrated appendix summarizing present knowledge of optical mechanisms in compound eyes and a useful bibliography.

Methods of Microarray Data Analysis V Patrick McConnell, Simon Lin, Patrick Hurban, 2007-02-24 As studies using microarray technology have evolved so have the data analysis methods used to analyze these experiments. The CAMDA Critical Assessment of Microarray Data Analysis conference was the first to establish a forum for a cross section of researchers to look at a common data set and apply innovative analytical techniques to microarray data. *Methods of Microarray Analysis V* includes selected papers from CAMDA 04 and focuses on data sets relating to a significant global health issue: malaria. Previous books focused on classification V I pattern recognition V II quality control issues V III and associating array data with a survival endpoint: lung cancer V IV. The contributions come from research fields including statistics, biology, computer science and mathematics. Part of the book is devoted to review papers which provide a more general look at various analytical approaches. It also presents some background readings for the advanced topics discussed in the CAMDA papers.

Handbook of Statistical Genetics David J. Balding, Martin Bishop, Chris Cannings, 2008-06-10 The Handbook for Statistical Genetics is widely regarded as the reference work in the field. However, the field has developed considerably over the past three years. In particular, the modeling of genetic networks has advanced considerably via the evolution of microarray analysis. As a consequence, the 3rd edition of the handbook contains a much expanded section on Network Modeling including 5 new chapters covering metabolic networks, graphical modeling and inference, and simulation of pedigrees and genealogies. Other chapters new to the 3rd edition include Human Population Genetics, Genome wide Association Studies, Family based Association Studies, Pharmacogenetics, Epigenetics, Ethics and Insurance. As with the second Edition, the Handbook includes a glossary of terms, acronyms and abbreviations and features extensive cross referencing between the chapters, tying the different areas together. With heavy use of up to date examples, real life case studies and references to web based resources, this continues to be a must have reference in a vital area of research. Edited by the leading international authorities in the field: David Balding, Department of Epidemiology, Public Health, Imperial College; an advisor for our Probability Statistics series; Professor Balding is also a previous Wiley author having written *Weight of Evidence for Forensic DNA Profiles* as well as having edited the two previous editions of HSG. With over 20 years teaching experience, he has also had dozens of articles published in numerous international journals. Martin Bishop, Head of the Bioinformatics Division at the HGMP Resource Centre, as well as the first two editions of HSG. Dr Bishop has edited a number of introductory books on the application of informatics to molecular biology and genetics. He is the Associate Editor of the journal *Bioinformatics* and Managing Editor of *Briefings in Bioinformatics*. Chris Cannings
