

# Marketing Metrics Primer

## Start Here. These Are The Basics of the Basics.

This marketing metrics primer is for owners of small businesses and marketing executives of large businesses – especially those who have had little or no experience with marketing metrics (marketing measurement). I have said that this web site is an introduction to marketing metrics. Well, this primer is an introduction to the introduction. It is written in straightforward language and simple math.

### The Marketing Metrics Process

This primer (introduction) shows you practical techniques for measuring the results of your marketing program. These step-by-step techniques are the components of a marketing metrics process. The process will:

1. Help you determine the profitability – [Return on Investment \(ROI\)](#) or [Return on Marketing Investment \(ROMI\)](#) – of your program.
2. Help you optimize your program to achieve the highest possible profitability.

If you have never measured your marketing profitability before, this primer will show you how.

If you already have a profitability-measurement system in place, this primer may help you strengthen your measurement system and identify profits you've overlooked. Most measurement systems unintentionally understate profitability. Later, I'll explain why. But first, I need to cover something fundamental. I need to define two terms as used in this primer: "results" and "measurement."

### Definition of the Term "Results"

Marketing programs, including advertising and public relations (PR) programs, can produce three types of results:

1. Awareness: The target audience knows something about your company, product or service.
2. Perception: The target audience thinks about your company, product or service in a certain way.
3. Behavior: The target audience does something (e.g., buys your product or service), or refrains from doing something (e.g., doesn't boycott your company). There are effective measurement techniques and tools for each type of result. However, in this marketing metrics primer you and I are interested primarily in behavior, because only behavior affects profitability directly.

So when I use the term "results" without any modifiers, I mean actual behavior.

### Definition of the Term "Measurement"

The past present and future of green chemistry and green engineering. From college campuses to corporations the past decade witnessed a rapidly growing interest in understanding sustainable chemistry and engineering. Green Chemistry and Engineering: A Practical Design Approach integrates the two disciplines into a single study tool for students and a practical guide for working chemists and engineers. In Green Chemistry and Engineering the authors each highly experienced in implementing green chemistry and engineering programs in industrial settings provide the bottom line thinking required to not only bring sustainable chemistry and engineering closer together but to also move business towards more sustainable practices and products. Detailing an integrated systems oriented approach that bridges both chemical syntheses and manufacturing processes this invaluable reference covers Green chemistry and green engineering in the movement towards sustainability. Designing greener safer chemical synthesis. Designing greener safer chemical manufacturing processes. Looking beyond current processes to a lifecycle thinking perspective. Trends in chemical processing that may lead to more sustainable practices. The authors also provide real world examples and exercises to promote further thought and discussion. The EPA defines green chemistry as the design of

chemical products and processes that reduce or eliminate the use or generation of hazardous substances Green engineering is described as the design commercialization and use of products and processes that are feasible and economical while minimizing both the generation of pollution at the source and the risk to human health and the environment While there is no shortage of books on either discipline Green Chemistry and Engineering is the first to truly integrate the two [Green and Sustainable Chemistry and Engineering](#) Concepción Jiménez-González,David J.
