Metro Area Networking:

Metro Area Networking Steven Shepard, 2003 Broadband in the Metro Area has proven to be telecom's one bright spot in 2001 all the long haul backbone capacity in the world does you no good if you can't move your data through the Metro bottleneck But service providers are wrestling with all manner of technology choices SONET DWDM Ethernet The coming 10Gig Ethernet and also face the challenge of easily and effectively accessing SANs and VPNs Quality of service issues are crucial in recruiting and maintaining customers Steven Shepard lays bare the tricks and traps awaiting service providers in the metro area space detailing the technological challenges and opportunities in his trademark lucid humorous prose

MPLS for Metropolitan Area Networks Nam-Kee Tan, 2004-11-15 MPLS for Metropolitan Area Networks demonstrates solutions provided by MPLS features The text opens with an overview of metro networks and MPLS It examines traffic engineering issues focusing on fundamental TE concepts and network control The author then discusses how MPLS can bring increased reliability to Metropolitan Area Networks MANs and concludes with a detailed analysis of the service aspects of MANs Topics reviewed include L3 and L2 MPLS VPNs geographically dispersed Ethernet multipoint services virtual private LAN services VPLS and the integrated services IntServ and differentiated services DiffServ QoS models with respect to MPLS

SONET-based Metro Area Networks Daniel Minoli, Peter Johnson, Emma Minoli, 2002-06-22 The hottest issue in telecom today is how to solve the Metro Area bandwidth bottleneck with SONET being the solution that appeals to most telecom companies But to compete against Ethernet SONET will need plenty of fine tuning This book will help service providers compare their options and fully understand what is really necessary to give current SONET installations next generation capabilities Shows how to achieve new generation features with enhanced SONET and other optical architectures Compares SONET's features and services with rival Ethernet based offerings Offers design approaches and business models for real world deployments Covers GMPLS generalized MPLS a red hot switching technology for wavelength services In 2001 the telecom industry spent money on solving the Metro Area bandwidth bottleneck SONET appeals to the telcos because it is widely deployed reliable robust and scalable But it will need multiple changes and enhancements to compete against the emerging rival Ethernet

Metropolitan Area Networks Matthew N.O. Sadiku, 1994-12-27 The demand for communication networks has increased dramatically in the last few years creating a need for an intermediate network that operates over a metropolitan area at comparatively high data rates with simple protocols With some characteristics of local area networks and wide area networks the metropolitan area network MAN technology reflects the best features of both The motivations for MAN technology include o interconnection of LANs o high speed services o integrated services MANs can be used in the following areas LAN interconnection Filetransfer Distributed processing Remote services Remote login Metropolitan Area Networks provides an introduction to the key concepts of MANs in an easily understood style Organized into five chapters this unique book acts as an excellent reference for a beginner as well as for the veteran in the field Topics include
