[Suicide in Geriatric Populations](#) Vincenzo De Luca, Gary Cheung, Hanafi Ahmad Damanhuri, Xenia Gonda, 2025-11-05

Within the domain of geriatric psychiatry the theme of suicide casts a significant shadow on the well being of older adults. It is closely intertwined with mental health as understanding this complex relationship is paramount. Suicide risk assessment and management strategies are pivotal in addressing the unique needs of this demographic. Ethical dilemmas arise when considering end of life choices such as euthanasia and Medical Assistance in Dying (MAiD) within geriatric contexts. Exploring the interface between neurodegenerative diseases, neuropsychological assessments, rural living, late life schizophrenia, and factors associated with suicide risk in older adults presenting in emergency departments adds layers of complexity to the narrative. In these circumstances a comprehensive multidisciplinary approach to geriatric mental health becomes even more crucial especially when considering the limited access to healthcare often faced by this vulnerable population. *Frontiers in Psychiatry* is looking to address key aspects of suicide in geriatric populations in order to promote important discussions around this topic and commission high quality research articles on this area. This Research Topic is led by an expert team of specialists with the goal of highlighting the latest discoveries as well as welcoming submissions around analyses or previously published data, new opinions and perspectives and methods and protocols. Sub themes for this Research Topic may include but are not limited to: Suicide behaviour and mental health in older adults, Suicide risk assessment and management in the geriatric population, Importance of childhood circumstances in predicting suicidal ideation among older adults in Europe, Suicide and Euthanasia, MAiD, Neurodegenerative disease and suicide, Neuropsychological assessment and suicidal risk in geriatric populations, Suicide in older adults living in rural communities, Suicide in late life schizophrenia, Factors associated with suicide risk in older adults presenting in the emergency department. Contributions of Behavior Analysis to Reading and Writing Comprehension

Alessandra Rocha de Albuquerque, Raquel Maria de Melo, 2023-10-13. This book shows how behavior analysis can be applied to teaching reading and writing to primary school students and to special populations such as children with intellectual and hearing disabilities and illiterate adults. Originally published in Portuguese, this contributed volume is now translated into English and presents for the first time to international researchers and students a comprehensive overview of a research program developed for more than three decades in Brazil which gave birth to a unique teaching program based on the concept of stimulus equivalence. The Learning to Read and Write in Small Steps. The book is divided into four parts. The first part presents the theoretical framework and the historical context in which the teaching program was developed by the group led by Drs. Julio Cesar de Rose and Deisy das Graças de Souza, currently organized in the National Institute of Science and Technology on Behavior, Cognition and Learning (INCT ECCE). The second part describes the modules that make up the

Learning to Read and Write in Small Steps teaching program The third part presents results of empirical research conducted with children with intellectual and hearing disabilities and illiterate adults Finally the fourth part presents contributions from other areas of knowledge such as speech therapy linguistics and education to the understanding of reading and writing and possible dialogues between them and behavior analysis Contributions of Behavior Analysis to Reading and Writing Comprehension will be of interest to researchers and students in the fields of psychology and education interested in the application of behavior analysis to teaching and learning processes It will also be a valuable resource for professionals directly working in educational institutions such as elementary school teachers and psycho pedagogues The translation of the original manuscript in Portuguese was done with the help of artificial intelligence The present version has been revised technically and linguistically by the authors in collaboration with a professional translator
