

A female dental professional with long brown hair, wearing a white short-sleeved shirt, a light blue surgical mask, and blue nitrile gloves, is leaning over an elderly male patient. She is holding a circular dental mirror in front of the patient's mouth. The patient, who has grey hair and a beard, is sitting in a dental chair with a light blue headrest and is looking into the mirror with a smile. The background is a blurred dental office setting with shelves and equipment. An orange curved shape is in the bottom left corner.

## **Oral Health And Aging:**

**Oral Health and Aging** Christie-Michele Hogue, Jorge G. Ruiz, 2022-02-01 This book provides a comprehensive review of the assessment and management of older people's oral health care needs. Discussing recent initiatives to emphasize oral health promotion and prevention, the book describes improvements in pharmacological and non-pharmacological approaches for special populations in geriatrics and illuminates the role of barriers to oral health care for older people. Divided into three sections, the book first explores aging and oral health, including age-related changes, epidemiology, nutrition, dysphagia, aspiration pneumonia, xerostomia, and hyposalivation; management of periodontal disease and caries; systemic diseases that influence oral health; and considerations for chronic orofacial pain. The second section illuminates the ways in which frailty and other geriatric syndromes influence oral health care in older adults, with a special focus on frailty, dementia, delirium, and depression, and the delivery of oral health care to vulnerable geriatric populations in long-term care, home care, palliative care, and hospice. Lastly, the book addresses inequalities in the oral health of older minority populations, the disproportionate burden of oral disease and tooth loss, the contribution of these issues to further complications in comorbidities, the association of extended health literacy and periodontal disease, and the social and cultural conditions that might be altered or improved by healthcare programs and health policies. *Oral Health and Aging* is a useful book written by an international group of experts and designed to educate geriatricians, primary care physicians, nurses, dentists, dental hygienists, speech and language pathologists, dietitians, and health policy advocates. **Geriatric Dentistry** Athena S. Papas, Linda C. Niessen, Howard H. Chauncey, 1991 **Oral Health and Aging** Ames F. Tryon, 1986 **Improving Oral Health for the Elderly** Ira B. Lamster, Mary E. Northridge, 2008-01-11 This excellent new work confronts two important oral health policy concerns in the United States: the disparities in the oral disease burden and the inability of certain segments of the population to access oral health care. The book examines in depth this crucial yet frequently overlooked indicator of seniors' quality of life. It provides an invaluable set of recommendations to the clinical research and administrative communities that will serve the elderly population. *Oral Health for an Ageing Population* Kakuhiro Fukai, 2024-11-13 Enables readers to understand practical solutions to reduce oral disease and improve oral health in a growing aging population. *Oral Health for an Ageing Population* offers global evidence and practical solutions to enable dental clinicians and policymakers implement effective policies and practices compatible with local needs and resources. The text clearly interprets evidence into knowledge, knowledge into policy, and policy into practice in the context of dental and general health care provision, offering international perspectives and specific examples of implemented global policies. Specific sample topics covered in *Oral Health for an Ageing Population* include: Burden of global aging and how to achieve oral health among the elderly, including detailed recommendations for integrated clinical and community initiatives; Sustainable development goals; common risk factor approach; life course approach; non-communicable diseases and frailty prevention; Implementing effective health policy at the international and

national level and improving attitudes and awareness among the general public regarding oral health Learning from the experience of Japan the UK and other countries plus recommendations for future research policy and practice Written by a leading expert in dental geriatrics Oral Health for an Ageing Population is based on decades of experience dealing with oral health and general health issues arising in an aging society It provides extensive reviews of the relevant empirical evidence and practical implementation proposals for dentists dental hygienists other healthcare professionals and policymakers
