years The Great Basin and in particular the Lake Abert region is special and needs our attention to ensure it remains that way We must recognize the importance of water for Great Basin ecosystems and the need to manage it better and we must acknowledge how rich the Great Basin is in natural history Salt lakes wherever they occur are valuable and provide critically important habitat for migratory water birds which are unfortunately under threat from upstream water diversions and climate change Larson s book will help people understand that the Great Basin is unique and that wise stewardship is necessary to keep it unspoiled The book is an essential reference source drawing together a wide range of materials that will appeal to general readers and researchers alike Conflicts over Natural Resources Jacqueline Vaughn,2007-01-08 This work is an overview of the critical natural resource conflicts facing the United States and the world and current attempts to resolve them peacefully Conflicts over natural resources are not new But they are now worldwide enduring increasingly contentious and in some cases intractable In this new book political scientist Jacqueline Vaughn explores conflicts over natural resources both renewable and nonrenewable in the United States and from a worldwide perspective Conflicts over Natural Resources focuses on four major controversies minerals oil and natural gas drilling protected areas policy range land management and timber and forests On the global level the work also explores issues surrounding diamonds and precious metals forest destruction and water scarcity For students professionals and lay readers alike this book offers a thorough and balanced grounding in both the problems surrounding resource management and the successful strategies for resolution
