Organ Doses from Medical X-ray Examinations Calculated Using Monte Carlo Techniques D. G. Jones, B. F. Wall, Great Britain. National Radiological Protection Board, 1985

Handbook of Anatomical Models for Radiation Dosimetry Xie George Xu, Keith F. Eckerman, 2009-09-01 Over the past few decades the radiological science community has developed and applied numerous models of the human body for radiation protection diagnostic imaging and nuclear medicine therapy The Handbook of Anatomical Models for Radiation Dosimetry provides a comprehensive review of the development and application of these computational mode

Radiation Exposure and Image Quality in X-Ray Diagnostic Radiology Horst Aichinger, Joachim Dierker, Sigrid Joite-Barfuß, Manfred Säbel, 2011-10-25 This completely updated second edition of Radiation Exposure and Image Quality in X ray Diagnostic Radiology provides the reader with detailed guidance on the optimization of radiological imaging The basic physical principles of diagnostic radiology are first presented in detail and their application to clinical problems is then carefully explored The final section is a supplement containing tables of data and graphical depictions of X ray spectra interaction coefficients characteristics of X ray beams and other aspects relevant to patient dose calculations In addition a complementary CD ROM contains a user friendly Excel file database covering these aspects that can be used in the reader s own programs This book will be an invaluable aid to medical physicists when performing calculations relating to patient dose and image quality and will also prove useful for diagnostic radiologists and engineers

Reference Doses and Quality in Medical Imaging B. Bauer, 1998

Clinical 3D Dosimetry in Modern Radiation Therapy Ben Mijnheer, 2017-10-31 This book provides a first comprehensive summary of the basic principles instrumentation methods and clinical applications of three dimensional dosimetry in modern radiation therapy treatment The presentation reflects the major growth in the field as a result of the widespread use of more sophisticated radiotherapy approaches such as intensity modulated radiation therapy and proton therapy which require new 3D dosimetric techniques to determine very accurately the dose distribution It is intended as an essential guide for those involved in the design and implementation of new treatment technology and its application in advanced radiation therapy and will enable these readers to select the most suitable equipment and methods for their application Chapters include numerical data examples and case studies

Multislice CT Maximilian F Reiser, Christoph R. Becker, Konstantin Nikolaou, Gary Glazer, 2008-10-20 With contributions by numerous experts

Imaging Practice and Radiation Protection in Pediatric Radiology Michael Seidenbusch, Veronika Rösenberger, Karl Schneider, 2019-12-05 This book offers the reader sound advice on how to perform optimal conventional pediatric radiographs and how to obtain quick and easy organ dose estimates in order to improve the optimization process in pediatric imaging Clear guidelines are provided for minimization of the radiation exposure of children through optimization of the radiation exposure conditions and conversion coefficients are presented for calculation of the organ doses achieved in organs and tissues during conventional pediatric radiography taking into consideration both optimal

and suboptimal radiation field settings Previously published conversion coefficients have failed to represent the variation in radiation field settings in daily clinical routine which has made it difficult for the pediatric radiologist to estimate the impact of the field settings on absorbed doses in organs and tissues The aim of this book co written by a pediatric radiologist a physician and physicist and a medical radiation technologist is to address this issue by providing for the first time a thorough overview of clinical radiation field settings and their implications for radiation protection An accompanying volume is devoted to fluoroscopy
