Global Trends in Media Education Tony Lavender, Birgitte Tufte, Dafna Lemish, 2003. Over the last decades, Media Education has gradually obtained an educational status in many countries throughout the world, although few countries have actually incorporated this subject in their formal school curricula. Where Media Education is taught today, it is principally carried out using a relaxed pluralistic and a cross or multidisciplinary approach. This book sets out to explore this new approach to the subject via chapters that are representative of ongoing work by leading Media Education researchers in nine different countries and from all five continents. Media Education is continually evolving, and the individual chapters indicate that the passion for the subject is global, while the actual translations of practices and policies are very much local. The book expands the debate about Media Education beyond the traditions and interests of one part of the world to encompass the needs of the rest.

The Urban Caribbean in an Era of Global Change Robert B. Potter, 2000. Based on the author's first-hand field research, this book addresses the twin processes of urbanization and globalization as they affect the contemporary Caribbean region. One of the key aims of the book is to focus attention on the fact that, contrary to popular perceptions, the Caribbean is highly urbanized. Indeed, statistics show that the region is more highly urbanized than the world taken as a whole. In addition, the fact that the Caribbean region has always been affected by processes of globalization in respect of its economy, polity, and society is central to the text. The chapters cover pressing topics such as urban change and the evolution of mini-metropolitan regions, the importance of the mercantile and plantopolis frameworks, tourism, post-modernity, and the urban nexus, economic change, and the dual processes of global convergence and divergence, and the nature of the relationships existing between the state, the informal sector, housing, and environmental conditions. In reality, it is shown that the development of tourism and enclave manufacturing is leading to new forms of urban concentration and not spatial dispersal.
