## **Order, Contestation and Ontological Security-Seeking in the South China Sea** Anisa Heritage, Pak K.

Lee, 2020-01-22 This book examines the South China Sea territorial disputes from the perspective of international order The authors argue that both China and the US are attempting to impose their respective preferred orders to the region and that the observed disputes are due to the clash of two competing order building projects Ordering the maritime space is essential for these two countries to validate their national identities and to achieve ontological security Because both are ontological security seeking states this imperative gives them little room for striking a grand bargain between them The book focuses on how China and the US engage in practices and discourses that build contest and legitimise the two major ordering projects they promote in the region It concludes that China must act in its legitimation strategy in accordance with contemporary publicly accepted norms and rules to create a legitimate maritime order while the US should support ASEAN in devising a multilateral resolution of the disputes The United States, India and the Global Nuclear Order Tanvi Pate, 2018-06-13 In the Post Cold War era US nuclear foreign policies towards India witnessed a major turnaround as a demand for cap reduce eliminate under the Clinton administration was replaced by the implementation of the historic civil nuclear deal in 2008 by

Bush a policy which continued under Obama's administration This book addresses the change in US nuclear foreign policy by focusing on three core categories of identity inequality and great power narratives Building upon the theoretical paradigm of critical constructivism the concept of the state is problematised by focusing on identity related questions arguing that the state becomes a constructed entity standing as valid only within relations of identity and difference Focusing on postcolonial principles Pate argues that imperialism as an organising principle of identity difference enables us to understand how difference was maintained in unequal terms through US nuclear foreign policy This manifested in five great power narratives constructed around peace and justice India Pakistan deterrence democracy economic progress and scientific development Identities of race political economy and gender in terms of radical otherness and otherness were recurrently utilised through these narratives to maintain a difference enabling the respective administrations to maintain US identity as a progressive and developed western nation intrinsically justifying the US role as an arbiter of the global nuclear order A useful work for scholars researching identity construction and US foreign and security policies US India bilateral nuclear relations South Asian nuclear politics critical security and postcolonial studies

**When Right Makes Might** Stacie E. Goddard, 2018-12-15

Why do great powers accommodate the rise of some challengers but contain and confront others even at the risk of war When Right Makes Might proposes that the ways in which a rising power legitimizes its expansionist aims significantly shapes great power responses Stacie E Goddard theorizes that when faced with a new challenger great powers will attempt to divine the challenger's intentions does it pose a revolutionary threat to the system or can it be incorporated into the existing international order

Goddard departs from conventional theories of international relations by arguing that great powers come to understand a contender's intentions not only through objective capabilities or costly signals but by observing how a rising power justifies its behavior to its audience. To understand the dynamics of rising powers then we must take seriously the role of legitimacy in international relations. A rising power's ability to expand depends as much on its claims to right as it does on its growing might. As a result, *When Right Makes Might* poses significant questions for academics and policymakers alike. Underpinning her argument on the oft-ignored significance of public self-presentation, Goddard suggests that academics and others should recognize talk's critical role in the formation of grand strategy. Unlike rationalist and realist theories that suggest rhetoric is mere window dressing for power, *When Right Makes Might* argues that rhetoric fundamentally shapes the contours of grand strategy. Legitimacy is not marginal to international relations; it is essential to the practice of power politics and rhetoric is central to that practice.

**Drones and Global Order** Paul Lushenko, Srinjoy Bose, William Maley, 2021-12-28 This book explores the implications of drone warfare for the legitimacy of global order. The literature on drone warfare has evolved from studying the proliferation of drones to measuring their effectiveness to exploring their legal, moral, and ethical impacts. These three waves of scholarship do not, however, address the implications of drone warfare for global order. This book fills the gap by contributing to a fourth wave of literature concerned with the trade-offs imposed by drone warfare for global order. The book draws on the English School of International Relations Theory, which is premised on the existence of a society of states bounded by common norms, values, and institutions, to argue that drone warfare imposes contradictions on the structural and normative pillars of global order. These consist of the structure of international society and diffusion of military capabilities, as well as the sovereign equality of states and laws of armed conflict. The book presents a typology of contradictions imposed by drone warfare within and across these axes that threaten the legitimacy of global order. This framework also suggests a confounding consequence of drone warfare that scholars have not hitherto explored rigorously: drone warfare can sometimes strengthen global order. The volume concludes by proposing a research agenda to reconcile the complex and often counter-intuitive impacts of drone warfare for global order. This book will be of considerable interest to students of security studies, global governance, and International Relations.

*Israel Studies Forum*, 2003 **Colonial Power and National Identity** Marie Demker, 2008 This study addresses the puzzle why French Prime Minister Pierre Mendès France managed to grant Indochina independence through negotiations but neglected the same demand from Algeria.

**The Power of Words in International Relations** Charlotte Epstein, 2008 The role of discursive power in shaping international relations analysed through the lens of whaling politics.
