## **Ordinary Consumption:**

**Ordinary Consumption** Jukka Gronow, Alan Warde, 2013-01-11 The sociology of consumption has concentrated unduly on the more spectacular and visual aspects of contemporary consumer behaviour thereby constructing an unbalanced and misleading view. This collection emphasises ordinary rather than extraordinary items, routine and repetitive behaviour rather than conscious decision making. It studies practical contexts of use rather than decisions to purchase and analyses collective identification rather than personal identity. Each essay argues one or more of these points for the most part using new empirical material from several different national contexts. The topics analysed include shopping in Taiwan, second home ownership in France, environmental considerations concerning food choice in Denmark, the take up of new domestic technologies in Finland and kitchen design in England. Key concepts like tradition, routine and habit are clarified and new conceptual distinctions are made with the book defending theoretical approaches deriving from Simmel, Weber, Durkheim and Bourdieu. Ordinary Consumption promotes a distinctive approach to the understanding of the central practices of consumer society; it is a book with a controversial message one which will be a source of debate about the appropriate agenda for future research.

**Ordinary Consumption** GRONOW, Professor Alan Warde, 2000-01-01 **Encyclopedia of Consumer**

**Culture** Dale Southerton, 2011-09-15 The Encyclopedia of Consumer Culture is the first reference work to outline the parameters of consumer culture and provide a critical scholarly resource on consumption and consumerism.

**The Ethical**

**Consumer** Rob Harrison, Terry Newholm, Deirdre Shaw, 2005-03-15 This book is not simply the best book on the remarkable phenomenon of today's ethical consumer. It is a gift of advice and insight from the people that know best to the cause of tomorrow. Many of the writers deserve the plaudits of being pioneers of a new consumer movement. These are the issues of our time: Ed Mayo, Chief Executive of the UK's National Consumer Council (NCC). Who are ethical consumers and why are they on the rise? Leading the way towards answering this question, *The Ethical Consumer* is an indispensable introduction to the subject. Exploring areas like boycotts and fair trade projects, it gathers together the diverse experiences of scholars, campaigners and business practitioners from the international community. The chapters in this book explore ethical consumer behaviours, motivation and narratives, the social, political and theoretical contexts in which ethical consumers operate, the responsibilities of businesses and the effectiveness of ethical consumer actions. Contributions are informed by a broad range of research methods from case studies, focus groups to surveys and interviews. The text is of interest to business related graduates, undergraduates and their tutors on courses relating to consumption. It will also be relevant to academics in other disciplines as well as to politicians, producers, practitioners, campaigners and, not least, consumers.

**Innovation by**

**demand** Andrew McMeekin, Mark Tomlinson, Ken Green, Vivien Walsh, 2013-07-19 The structure and regulation of consumption and demand has recently become of great interest to sociologists and economists alike and, at the same time, there is growing interest in trying to understand the patterns and drivers of technological innovation. This book brings

together a range of sociologists and economists to study the role of demand and consumption in the innovative process The book starts with a broad conceptual overview of ways that the sociological and economics literatures address issues of innovation demand and consumption It goes on to offer different approaches to the economics of demand and innovation through an evolutionary framework before reviewing how consumption fits into evolutionary models of economic development Food consumption is then looked at as an example of innovation by demand including an examination of the dynamic nature of socially constituted consumption routines The book includes a number of illuminating case studies including an analysis of how black Americans use consumption to express collective identity and a number of demand innovation relationships within matrices or chains of producers and users or other actors including service industries such as security and the environmental performance of companies The involvement of consumers in innovation is looked at including an analysis of how consumer needs may be incorporated in the design of high tech products The final chapter argues for the need to build an economic sociology of demand that goes from micro individual through to macro structural features An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence **The Lancet**, 1911
