Sanderson, Karen R. Huffman, 2019-12-24 Real World Psychology balances comprehensive coverage of the key concepts in introductory psychology with a concise presentation style and engages students with current and interesting research that explores these concepts in real-life contexts. Real World Psychology features the incomparable author team of Karen Huffman, Palomar College, and Catherine Sanderson, Amherst College, who create an outstanding text that is appealing to students and instructors at a wide range of academic institutions. The new edition has been thoroughly updated and features a new focus on Scientific Thinking and Practical Applications, underscoring the fact that connecting the principles of psychological science to everyday life is critical to student engagement and ultimately key to their success, not only in the introductory psychology course but in whatever their chosen field of study and in everyday life. Students will leave the course with an appreciation of how a basic yet scientific understanding of human behavior can benefit them in their studies, in their personal lives, and in their professional endeavors. **Religion, Spirituality, and Public Health** Karen O'Brien-Kop, Suzanne

Newcombe, 2025-10-14 Religion, Spirituality, and Public Health focuses on exploring the role of different ways of knowing or arriving at truth, i.e., epistemes, particularly those found in religious and alternative health milieus. While biomedical solutions offer a dominant narrative, these are articulated differently in global contexts. Moreover, individuals often draw upon alternative framings that are sometimes oppositional to and at other times engaged with directives from medical and governmental authorities. The focus of this volume is worldviews and epistemes that are often marginalised or rejected in dominant discourses, from shamanism in Korea to African Pentecostalism in Britain and from global online AntiVax narratives to traditional Siddha medicine in South India. Detailed case studies explore the contested, competing, and strategically aligned relationships between mainstream and marginal epistemes between religious healing, spirituality, and biomedicine and between politics and belief. These explorations promote greater insight into how marginalised religious epistemes are

employed Which beliefs and practices are drawn upon to create meaningful and effective responses And how can we better understand the depth and breadth of these reactions to design more successful public health strategies for future global health crises *Yoga Journal* ,1997-01 For more than 30 years Yoga Journal has been helping readers achieve the balance and well being they seek in their everyday lives With every issue Yoga Journal strives to inform and empower readers to make lifestyle choices that are healthy for their bodies and minds We are dedicated to providing in depth thoughtful editorial on topics such as yoga food nutrition fitness wellness travel and fashion and beauty Books Out Loud ,2004
