Managing School Intellectual Capital for Strategic Development Eric C. K. Cheng, 2022-07-29 Cheng articulates the extent to which knowledge management approaches can create Intellectual Capital IC and contribute to improvements in education quality He argues that public schools have long contended with the requirements of quality assurance in a competitive environment of decreasing student numbers increasing parental choice

and rising standards of accountability As public organisations schools have to demonstrate appropriate resource management and show evidence that they are meeting defined development plans and goals Cheng proposes a strategic approach IC management to help schools respond to and cope with the increasingly competitive environment while enhancing school capacity for improving student learning First the book guides readers to understand the development of IC theory in the context of education to address the requirements of quality assurance and accountability It then introduces Lesson Study e Learning and Information and Communication Technology ICT as key resources and drivers for building school IC and examines the organisational factors that enable knowledge management approaches for developing IC in schools from both Asia and Europe It concludes by offering strategies and implementation methods to manage school IC for sustainable development Combining research from Asia and Europe this edited volume will be useful for school leaders and policy makers as well as those researching school leadership and IC

Global Trends in Communication Education and Research Kenneth W. Y. Leung, James Francis Kenny, Paul S. N. Lee, 2006

Knowledge & Power in the Global Economy David Gabbard, 2008 The second edition of Knowledge and Power in the Global Economy examines how neoliberal and neoconservative policies are working in tandem to privatize and commercialize public schools It looks at how these policies and the agendas behind them have impacted the internal dynamics of school management teaching and learning as well as how they have transformed the external dynamics of education from a public good or service offered to serve public interests to a private enterprise primarily serving private interests In addition to information critique and analysis multiple perspectives are provided that readers can draw upon to formulate an alternative vision of education as a crucial element of social change along democratic and egalitarian lines The first edition of this volume provided a critical encyclopedic approach to the rhetoric of educational reform as it developed from the 1980s through the 1990s critiquing its vocabulary elaborating the multiplicity of ways that the logic of neoliberalism and the emerging patterns of high stakes testing and accountability were impacting the curriculum and introducing ideas associated with alternative and liberatory educational projects Since its publication in 2000 policy developments such as the No Child Left Behind Act of 2001 in the U S and others in the U K and other parts of the world have nationalized and intensified these patterns deepening the logic and extent of neoliberalism's hold over educational reforms At the same time it is impossible to understand the current crises in education solely in terms of neoliberalism the impact of neoconservatism must also be considered Hence this second edition has a new subtitle The Effects of School Reform in a Neoliberal Neoconservative Age This edition is structured around five themes Political and Social Foundations Anti Educational Foundations The Set Up Anti Educational Foundations The Trap Classroom Consequences and Democracy's Path This volume will particularly interest scholars and professionals across the fields of educational foundations curriculum theory and educational policy and is well suited as a text for courses in these areas
