**Management of Marine Fisheries in Canada** L. S. Parsons, National Research Council Canada, Canada. Department of Fisheries and Oceans, 1993. This report describes and evaluates the impact of the major changes in the management of Canada's marine fisheries in recent decades. The report covers the historical and jurisdictional context, biological and economic aspects, objectives of fisheries management techniques of resources management in general and those used for specific species, managing the common property through allocation of access, limited entry, licensing and individual quotas, the international dimension, the social dimension, habitat management, fisheries enforcement and fisheries management in the United States, Australia, New Zealand, Norway, Iceland and the European Community.

*Australia's Economy in Its International Context, Volume 2: 1956-2012* Kym Anderson, 2012. This two-volume collection brings together the first 56 Joseph Fisher Lectures in economics and commerce presented at the Adelaide University every other year since 1904. Funds for the Lectures together with a medal for the top accounting student each year were kindly provided by a 1 000 endowment to the University by the prominent Adelaide businessman Joseph Fisher in 1903. The Lectures address a wide range of Australian economic issues in addition to some international economic issues of national significance. They have stood the test of time extremely well while also providing a reminder of the events and concerns that were prominent at different times during the past century.

**Review of the State of World Marine Capture Fisheries Management** Food and Agriculture Organization of the United Nations, 2007. During the first half of the 1990s in response to the increasing concern about many of the world's fisheries, a number of international fisheries instruments provided an impetus for countries to strengthen their fisheries management. A key step in supporting such efforts is the development of more detailed systematic and comparable information on fisheries environments and management trends. The State of World Marine Capture Fisheries Management Questionnaire was developed by FAO in 2004 to help meet this need. The results have been grouped by region and are reported in this publication. More than a decade later we are able to look back to see how countries responded to examine whether more fisheries are managed and to determine whether the management tools and strategies employed have improved the overall situation in marine capture fisheries. Trends in legal and administrative frameworks, management regimes and status of marine capture fisheries are analysed for 29 countries in the Pacific Ocean and presented in this report and on the accompanying CD ROM as an easy-to-read and informative reference for policy decision makers, fishery managers and stakeholders.
